birth defects, reproductive or developmental harm and directs the Department of Health and Human Services, Maine Center for Disease Control and Prevention to study ways to eliminate infant exposure to these chemicals and report back to the Legislature by December 15, 2007.

LD 838 An Act Protecting the Confidentiality of Prescription Information

**ACCEPTED ONTP
REPORT**

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
TREAT	ONTP MAJ OTP-AM MIN	

This bill extends the privacy of prescription drug information from individuals to prescribers and clarifies that privacy applies to certain regulated transactions. In addition it extends the law to cover transfers of information by pharmacies and administrators for health plans. The bill provides exceptions for transfers related to dispensing prescription drugs, patient care, pharmacy reimbursement, utilization review, formulary and prior authorization compliance, care management, changes in pharmacy ownership, the Controlled Substances Prescription Monitoring Program and data that cannot be used to identify the individual or the provider. It removes the exception for disclosures expressly permitted by the Maine Revised Statutes, Title 22, section 1711-C; Title 24; Title 24-A; and the federal Health Insurance Portability and Accountability Act.

LD 839 An Act To Establish a Prescription Drug Academic Detailing Program

PUBLIC 327

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
TREAT SCHNEIDER	OTP-AM	H-549

This bill establishes within the Department of Health and Human Services the prescription drug academic detailing program to enhance the health of residents of the State, to improve the quality of decisions regarding drug prescribing, to encourage better communication between the department and health care practitioners participating in publicly funded health programs and to reduce the health complications and unnecessary costs associated with inappropriate drug prescribing. The bill requires the department to investigate initially establishing the program collaboratively with the states of New Hampshire and Vermont. The bill requires the department to review and evaluate use of the educational and assessment materials developed by the Commonwealth of Pennsylvania for the prescription drug academic detailing program that involved the cooperative work of that state and Harvard Medical School and to consider adopting the Pennsylvania program as a starting point for the program. The bill coordinates the prescription drug academic detailing program with the department's public education initiative on prescription drug clinical trials and drug safety information and transfers one half of the annual revenues under the Maine Revised Statutes, Title 22, section 2700-A, subsection 4 for the use of the prescription drug academic detailing program.

Committee Amendment "A" (H-549)

This amendment is the majority report of the committee. The amendment clarifies that the basis for academic detailing is peer-reviewed scientific, medical and academic research publications. The amendment adds the requirement that academic detailers observe standards of conduct consistent with certain federal Food and Drug Administration and Office of the Inspector General requirements. The amendment clarifies that the Department of Health and Human Services may adopt routine technical rules to implement the prescription drug academic detailing program. The amendment also adds an appropriations and allocations section.
