STATE OF MAINE

123RD LEGISLATURE

FIRST REGULAR SESSION

LEGISLATIVE DIGEST OF BILL SUMMARIES AND ENACTED LAWS

This *Legislative Digest of Bill Summaries and Enacted Laws* summarizes all bills and adopted amendments and all laws enacted or finally passed during the First Regular Session of the 123rd Maine Legislature, which was in session from December 6, 2006 to June 21, 2007.

The *Digest* is arranged alphabetically by committee, and within each committee by LD number. The committee report(s), prime sponsor and lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are summarized and listed by paper number. A subject index is included with each committee. The appendices include a summary of relevant session statistics, an index of all bills by LD number and an index of enacted laws by law type and chapter number.

Final action on each bill is noted to the right of the bill title. The abbreviations used for various categories of final action are as follows:

EDGECOMB	ONTP	

This bill allows the Public Utilities Commission to order investor-owned transmission and distribution utilities to own or control generation assets if the commission determines that ownership or control is necessary to provide reliable and efficient service.

LD 1346 An Act To Enhance Maine's Energy Independence and Reduce Electricity Costs

ONTP

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
FLETCHER	ONTP	

Current law establishes as a policy of the State the goal of increasing the share of new renewable capacity resources as a percentage of the total capacity resources in this State by 10% by 2017. This bill implements that policy goal by establishing portfolio requirements for new renewable capacity resources, beginning at 1% for calendar year 2008 and increasing by one percentage point per year until 2017.

The bill allows competitive electricity providers to meet the new renewable capacity portfolio requirements through the use of renewable energy credits or an alternative compliance payment mechanism to be established by the commission. It allows competitive electricity providers to meet the renewable portfolio requirements through the use of renewable energy credits without requiring that the Public Utilities Commission determine that a reliable system of electrical attribute trading exists.

The bill allows the Public Utilities Commission to suspend all or some of the new renewable capacity portfolio requirements if it finds that investment in new renewable capacity resources is insufficient and the resulting use of the renewable energy credits or the alternative payment system has burdened electricity customers, and it requires the commission to suspend the requirements if the alternative payment system is used to meet the portfolio requirements for 3 or more consecutive years. The bill requires the commission to report annually to the Legislature regarding the status of new renewable capacity resources in the State. Finally, the bill requires the Public Utilities Commission to establish a standard-offer service that is composed of 100% renewable
