LD 2266 An Act To Promote Municipal Wind Generation Development

PUBLIC 671

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
MARTIN	OTP-AM	S-579 S-698 ROTUNDO

This bill expands the duties of the Energy Resources Council under the Maine Revised Statutes, Title 5, section 3327 to coordinate the activities of member agencies to assist the State's political subdivisions, state agencies and rural electrification cooperatives in developing wind and other projects, including using available federal loan subsidies. The bill also expands the scope of the life-cycle cost analysis that is required under the Energy Conservation in Buildings Act to include a review of the potential incorporation of wind and solar electricity generating equipment into public facilities, and it amends the laws governing revenue-producing municipal facilities to include any qualified project under the United States Internal Revenue Code, Section 54 within the definition of revenue-producing municipal facility.

The bill also amends provisions of the Maine Wind Energy Act to establish a state policy favoring development of cost-effective wind energy resources by municipalities and by the State for the benefit of Maine's citizens. It further directs the Public Utilities Commission to monitor legal and technological developments that may affect the potential for development of wind power and to regularly advise the Energy Resources Council of its findings.

It expands the authority of municipal electric districts and rural electrification cooperatives to allow them to sell energy to wholesale customers and to buy and sell electricity products in addition to electricity and to allow municipal electric districts to sell electricity and electricity products outside the district.

Committee Amendment "A" (S-579)

This amendment amends the provisions of the bill regarding the responsibilities of the Energy Resources Council to provide wind and other energy planning assistance to clarify that this assistance is intended to cover municipal or quasi-municipal entities and municipally owned corporations that provide electric service in addition to the State's political subdivisions and rural electrification cooperatives. It amends the provision of the bill regarding monitoring of legal and technological developments that may affect the potential for development of wind power resources to direct the chair of the Energy Resources Council, rather than the Public Utilities Commission, to do this work.

This amendment removes the provisions of the bill that expand the authority of municipal electric districts and rural electrification cooperatives to allow them to sell energy to wholesale customers and to buy and sell electricity products in addition to electricity and to allow municipal electric districts to sell electricity and electricity products outside the district. It also removes the provision that establishes a state policy favoring the development and ownership of wind energy projects by state agencies and political subdivisions. The amendment also adds an

Senate Amendment "A" (S-698)

This amendment redirects the responsibility for providing assistance in wind and other energy planning and monitoring of legal and technological developments from the chair of the Energy Resources Council to the Executive Department, Governor's Office of Energy Independence and Security and strikes the provision that requires the Executive Department, Governor's Office of Energy Independence and Security to assist the Department of Administrative and Financial Services, Bureau of General Services in identifying and planning for the construction of wind and other renewable electricity generation projects. It also strikes the appropriations and allocations section.
