Resolve, Regarding New Utility Line Extension Construction

RESOLVE 69

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
FLETCHER NUTTING J	OTP-AM	H-253

This bill directs the Public Utilities Commission to establish by rule standards for estimating the cost of construction of a new line extension by a transmission and distribution utility. The rules must require that a transmission and distribution utility provide a detailed quote that includes all costs to each residential, commercial or industrial customer seeking the construction of a new line extension. It prohibits a transmission and distribution utility from using average, per-unit costs based on the length of the line extension or the number of poles.

Committee Amendment "A" (H-253)

This amendment replaces the bill with a resolve. The amendment directs the Public Utilities Commission to convene a stakeholder group to study the practices of investor-owned transmission and distribution utilities with respect to new utility line extension construction and how these practices affect private line extension contractors. The amendment requires the commission to report to the Joint Standing Committee on Utilities and Energy no later than February 15, 2010 regarding the findings and recommendations of the stakeholder group. After receipt and review of the report, the committee is authorized to report out legislation to the Second Regular Session of the 124th Legislature, as necessary, to direct the Public Utilities Commission to amend its rules governing private line extensions.
