Joint Standing Committee on Energy, Utilities and Technology

Enacted Law Summary

Public Law 2013, chapter 325 modifies the permitting process for grid-scale wind energy developments by providing for public comment and the opportunity for the public to request a hearing and by permitting an intervenor to request an adjudicatory hearing. It provides a rebuttable presumption that wind energy development constitutes a significant adverse effect on natural resources if proposed in a Bicknell's Thrush habitat 25 acres or larger in which Bicknell's Thrush have been documented. The public law also requires that a grid-scale wind energy development permit application must contain options for best practical mitigation to reduce impacts on scenic or wildlife resources.
