LD 273 An Act To Encourage and Enhance the Future of Waste-to-energy CARRIED OVER
Facilities by Establishing a Portfolio Requirement for Electricity from
Waste Energy Resources

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
CAMPBELL R SAVIELLO		

This bill does the following.

1. It amends the definition of renewable capacity resource to include waste energy resources.
2. It defines "waste energy resource" as a source of electrical generation that is fueled by municipal solid waste in conjunction with recycling and whose total power capacity does not exceed 35 megawatts. In addition, the waste energy resource would have to meet Maine's air emissions standards for resource recovery facilities and licensing standards for solid waste facilities and ensure that residuals from the waste energy resource are disposed of at a landfill meeting Maine's licensing standards.
3. It requires 3.5 percent of a competitive energy providers portfolio to come from waste energy resources.
4. It allows competitive energy providers to satisfy the portfolio requirements for waste energy resources through an alternative compliance payment mechanism, the rate of which is to be established by rule yearly, by the Public Utilities Commission. Payment made by providers is to fund the Efficiency Maine Trust and Renewable Resource Fund.

This bill was carried over to any special or regular session of the 127th Legislature by joint order, H.P. 992.

LD 295 An Act To Promote Tidal Energy Projects ONTP

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
BURNS MAKER	ONTP	

This bill expands the definition of "tidal energy demonstration project" as it relates to general permits for tidal energy demonstration projects to cover tidal range projects. Tidal range projects capture the potential energy created by the difference in sea level (or head) across a marine enclosure.

This bill amends Public Law 2009, chapter 615 to allow the Public Utilities Commission to direct the renewal of a long-term contract for up to 25 years. This potential 25 year extension would be in addition to the current allowable term for a long-term contract of 20 years.

It increases the allowed installed capacity for both deep-water offshore wind energy pilot projects and tidal energy demonstration projects from 30 megawatts to 45 megawatts and allows up to 30 megawatts of that power to be

derived from tidal demonstration projects, which is an increase from five megawatts allowed under the current law.

Lastly, this bill directs the Commission to conduct additional competitive solicitation of proposals for tidal energy demonstration projects as soon as practicable after the bill becomes effective, and to make all reasonable efforts to complete its review of proposals and finalize long-term contracts as soon as practicable after initiating a solicitation.
