An Act To Update Maine's Solid Waste Management Laws

**Died On
Adjournment**

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
SAVIELLO T CAMPBELL R	OTP-AM	

This bill amends the State's solid waste management laws as follows.

1. It establishes a product stewardship program for small batteries.
2. It updates the State's recycling goal. Current statute sets a goal of recycling or composting 50% of the municipal solid waste tonnage generated each year within the State by January 1, 2014. This bill extends that goal deadline to January 1, 2021.
3. It implements a commercial food waste composting requirement under which a large quantity commercial food waste generator that is located within 20 miles of a composting facility with available capacity to accept the food waste produced by the generator is required to deliver all food waste produced to a composting facility for processing. A large quantity commercial food waste generator is a commercial entity that generates one ton or more of food waste per week. This bill authorizes the Department of Environmental Protection to provide a large quantity commercial food waste generator a waiver from the composting requirement if compliance would result in substantial financial hardship for the generator.
4. It eliminates the current statutory waste handling fee of \$1 per ton on the disposal at a commercial, municipal, state-owned or regional association landfill of municipal solid waste ash and front end process residue.
