Joint Standing Committee on Energy, Utilities and Technology

requirements for Class IA resources and thermal renewable energy credits.

This law requires the Public Utilities Commission to conduct two competitive solicitations for long-term contracts with Class IA resources to procure, in total, an amount of energy or renewable energy credits equal to 14% of retail electricity sales in the State during calendar year 2018. It allows energy storage systems to be awarded long-term contracts when paired as a complementary resource with a Class IA resource.

Finally, this law directs the Governor's Office of Policy and Management and the Governor's Energy Office to conduct a market assessment study and analysis of opportunities, potential and challenges in meeting the State's renewable energy goals. The report is due January 31, 2021.

LD 1542 An Act To Allow a Municipality To Choose Its Power Provider

ONTP

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
DENK D	ONTP	

This bill provides a process to allow a municipality to choose a single transmission and distribution utility via a referendum when that municipality is served by more than one utility. The decision to hold a referendum must be made by a majority vote of the municipal officials. A referendum to choose a single utility must occur during a gubernatorial or presidential election in November and must be called, advertised and conducted according to the law relating to municipal elections.

The bill also requires the choice of a single utility to be approved by the Public Utilities Commission. The commission is required to approve the choice if the commission finds that the chosen utility is willing to furnish service to the entire municipality, has the financial ability to meet its obligations under the Maine Revised Statutes, Title 35-A and is willing and able to pay a fair and reasonable price, as determined by the commission, for the assets of the second utility needed to furnish service to the entire municipality. Upon approval, the commission is directed to order the second utility to sell its assets used to serve the municipality to the chosen transmission and distribution utility. This bill also allows the commission to adopt routine technical rules to implement these provisions.
