member has a conflict of interest because of a relationship with, or compensation from, a pharmaceutical manufacturer, developer, labeler, wholesaler or distributor.

10. It requires a carrier to maintain certain records related to the administration and provision of prescription drug benefits under a health plan and authorizes the carrier to audit those activities. The law also authorizes the superintendent to have access to records upon request.

11. If a carrier uses a pharmacy benefits manager to administer or manage prescription drug benefits provided for the benefit of covered persons, it provides that any pharmacy benefits manager compensation constitutes an administrative cost incurred by a carrier for purposes of calculating the anticipated loss ratio. "Pharmacy benefits manager compensation" is defined in the law as the difference between the value of payments made by a carrier of a health plan to its pharmacy benefits manager and the value of payments made by the pharmacy benefits manager to dispensing pharmacists for the provision of prescription drugs or pharmacy services with regard to pharmacy benefits covered by the health plan.

12. It clarifies that the definition of "carrier" does not include a multiple-employer welfare arrangement if the multiple-employer welfare arrangement contracts with a 3rd-party administrator to manage and administer health benefits, including benefits for prescription drugs.

The provisions in Public Law 2019, chapter 469 take effect January 1, 2020.

**LD 1582      An Act Relating to Surgical Technologists and the Practice of Surgical Technology      ONTP**

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
NADEAU C VITELLI E	ONTP	

Surgical technologists are individuals with specialized education who function as members of a surgical team by providing support during every phase of a surgical case. This bill requires health care facilities to employ or contract with only certified surgical technologists for this function. A surgical technologist who is not certified, but who is practicing surgical technology on the effective date of this legislation, may continue in that employment after the effective date. After the effective date, a health care facility may hire a noncertified surgical technologist who is a recent graduate, but the individual is required to obtain certification within 6 months of graduation in order to remain employed. Further, a critical access hospital may employ a noncertified surgical technologist if that facility is unable to recruit certified personnel and maintains a record detailing its recruitment efforts. All employed surgical technologists, regardless of certification status, must meet stated continuing education requirements. Nothing in the bill prohibits a licensed practitioner from performing surgical technology duties that fall within the scope of that person's license.
