LD 1747 An Act To Strengthen Maine's Hemp Program

INDEF PP

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
JACKSON T		

This bill was not referred to committee.

The federal Agricultural Act of 2014, also known as the 2014 Farm Bill, legalized the growth and cultivation of hemp in states that choose to establish agricultural pilot programs for research purposes.

This bill requires the Commissioner of Agriculture, Conservation and Forestry to establish, by rule, the Maine Hemp Pilot Program, including the application process, licensing fees and reporting requirements, consistent with the 2014 Farm Bill. Under the pilot program, a licensee may plant, grow, harvest, possess, process, sell and buy hemp as long as the purpose of the program is to study the growth, cultivation or marketing of hemp. An institution of higher education is also authorized to establish a pilot program that complies with the 2014 Farm Bill as long as it provides notice of its intention to the Department of Agriculture, Conservation and Forestry and local law enforcement and an annual report to the department regarding its research.

This bill also expressly authorizes marijuana manufacturing facilities and testing facilities licensed under the Maine Medical Use of Marijuana Act and the Marijuana Legalization Act to obtain a license to process and test hemp and hemp-derived products that are legal under state and federal law.

Finally, this bill amends the recently enacted law that provides that food, food additives and food products containing hemp-derived cannabidiol are not considered to be "adulterated" under state law to require the Department of Health and Human Services and the Department of Agriculture, Conservation and Forestry to adopt routine technical rules regarding testing, labeling, packaging and record-keeping requirements for food, food additives or food products that contain hemp, including cannabidiol derived from hemp, and to also provisionally adopt emergency major substantive rules doing the same.
