JACKSON T MARTIN D	OTP OTP-AM	

Under current law, any number of customers of an investor-owned transmission and distribution utility with a shared financial interest in a distributed generation resource may participate in net energy billing, except that the number of eligible customers or meters is limited to 10 for a shared financial interest in a distributed generation resource located in the service territory of an investor-owned transmission and distribution utility located in an area administered by the independent system administrator for northern Maine unless the Public Utilities Commission determines that the utility's billing system can accommodate more than 10 accounts or meters for the purpose of net energy billing. This bill removes this exception.
