Baxter Compensation Authority

BCA Board Chair John Paterson Executive Director John Shattuck

March 5, 2007

The Honorable Margaret Rotundo, Senate Chair The Honorable Jeremy R. Fischer, House Chair 123rd Maine Legislature 5 State House Station Augusta, Maine 04333-0005

Dear Senator Rotundo, Representative Fischer, and Members of the Joint Standing Committee on Appropriations and Financial Affairs:

It is with great pleasure and appreciation that I provide you with the final report of activities of the Baxter Compensation Authority (BCA). The BCA was established by the 120th Legislature to review and adjudicate claims of physical or sexual abuse suffered by former students of the Governor Baxter School for the Deaf or the older Maine School for the Deaf.

The BCA began accepting claims of abuse in October of 2002. Over the next four and one half years, the BCA Compensation Panel of 3 adjudicators reviewed 361 claims for eligibility and compensation amount. The statutory deadline to file a claim for compensation was March 31, 2006. Most of the claims were from people currently residing in Maine, but through an ambitious outreach effort, we were able to contact many people throughout the country who were able to submit information to be considered by the Panel. Of the 361 claims, 342 people were found to have suffered abuse while a student at the state administered school for the Deaf. A total of \$17,740,000 was awarded in the individual amounts of \$100,000, \$60,000 or \$25,000. A break down of the awards is as follows:

\$100 <u>,000</u>	<u>\$60,000</u>	\$57,500 (lost appeal)	\$25,000	\$22,500 (lost appeal)
63	126	2	147	4

With all claims and appeals decided and awards processed, the BCA was able to officially "close its doors" on June 15, 2006 one year earlier than required by law. Maine's Deaf Community and those associated with the BCA will always be indebted to the Maine Legislature for its commitment in recognizing the State's responsibility in providing a sense of justice to those who suffered as children at the State administered school for the Deaf.

I would be happy to respond to any questions or concerns your Committee may have.

Sincerely,

John Shattuck

Commissioner Wyke

State of Maine DEPARTMENT OF EDUCATION

Testimony of Susan A. Gendron, Commissioner

In Support of L.D. 499

An Act Making Unified Appropriations and Allocations for the Expenditures of State Government, General Fund and Other Funds, and Changing Certain Provisions of the Law Necessary to the Proper Operations of State Government for the Fiscal Years Ending June 30, 2008 and June 30, 2009 (EMERGENCY) (GOVERNOR'S BILL)

Before the Joint Standing Committee on Appropriations and Financial Affairs and the Joint Standing Committee on Education and Cultural Affairs

Hearing Date: February 28, 2007

Senators Rotundo and Bowman, Representatives Fischer and Norton, and Members of the Joint Standing Committees on Appropriations and Financial Affairs and Education and Cultural Affairs:

My name is Susan A. Gendron, Commissioner of the Maine Department of Education, and I am here today to present testimony in support of those items in the Biennial Budget proposal that relate to Department of Education programs.

The Department's overall responsibility is to ensure that each child in Maine has access to meeting the standards of Maine's *Learning Results* through comprehensive planning and leadership.

The Part A Current Services request for the Department of Education being heard today may be found on pages 4-123 to 4-140 of the Committee copy, pages A-184, A-185, 1-193 and A-450 of the Budget Document and pages 196, 197, 198, 208 and 494 of L.D. 499. Today's public hearing also covers language Parts C, D, E, F, JJ and KK.

You will find in your documents an index and brief summary of each Part A request and language Parts C, D, E, F, JJ, and KK which I hope will be useful to you as we proceed.

The Governor Baxter School for the Deaf is the first item and it is being taken out of order. You will find it on 4-138 to 4-140 of the Committee copy, page A-450 of the Budget Document and page 494 of L.D. 499.

I am pleased to present the Department of Education's Part A request, and I look forward to working with both Committees in the days and weeks ahead as we collectively continue to support current initiatives as well as consider new initiatives in the way we provide equity and excellence for every student toward the achievement of Maine's *Learning Results*.

Department of Education L. D. 499 Biennial Budget FY 2008 – FY 2009

February 28, 2007

Committee Copy Pages Numbers and Requests

4-138 thru 4-140:

Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf – Transfers funds required for State support of the Governor Baxter School for the Deaf as part of the 55% level of State funding for General Purpose Aid. The Governor Baxter School for the Deaf will remain an independent agency governed by its own school board as provided in Title 20-A, Chapter 304.

4-123 thru 4-125:

<u>General Purpose Aid for Local Schools</u> – Provides funding for the baseline budget for General Purpose Aid to be distributed to local school administrative units.

Provides funding for the required State share of essential programs and services in accordance with Title 20-A, Chapter 606-B including Jobs for Maine's Graduates, the Maine School of Science and Mathematics, and the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf.

Reduces funding from the savings to school administrative units as a result of reorganization into regional learning centers.

Reduces funding for General Purpose Aid for local school administrative units from the savings to school administrative units as a result of increases in the student to teacher ratio.

Provides funding for the expansion of the Maine Learning Technology (laptops) Initiative program to the high school level.

4-126 & 4-127:

<u>Jobs for Maine's Graduates</u> – Transfers funds required for State support of the Jobs for Maine's Graduates as part of the 55% level of State funding for General Purpose Aid. The Jobs for Maine's Graduates program will continue to operate as an independent educational private non-profit organization governed by its own board of directors as provided in Title 20-A, Chapter 226.

4-128 & 4-129:

Magnet School, Maine School of Science and Mathematics – Transfers funds required for State support of the Maine School of Science and Mathematics as part of the 55% level of State funding for General Purpose Aid. The Maine School of Science and Mathematics will continue to operate as an independent school governed by its own board of trustees as provided in Title 20-A, Chapter 312.

4-130 thru 4-132:

<u>Language Part C Cost of Funding Public Education K-12</u> – Establishes the total cost of funding public education from kindergarten to grade 12, consisting of total operating allocations, total debt service allocation, total adjustments and miscellaneous costs and the state and local share of those costs.

This Part also authorizes the Commissioner to expend and disburse or transfer General Purpose Aid funds for Jobs for Maine's Graduates, the Maine School of Science and Mathematics and the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf.

4-133: <u>Language Part D, General Purpose Aid Support Activities</u> — Authorizes 6.615 positions that support the implementation of the Essential Programs and Services, and the transfer of funds from General Purpose Aid to Management Information Systems to support them. The current authorized level is 5. This authorization accommodates the addition of a Data Information Coordinator and .615 of an Office Assistant I to positions in the Management Information Systems.

Authorizes transfer of funding from the General Purpose Aid account to the Learning Through Technology account to support Personal Services and All Other for three positions, a Team Leader, an Education Specialist III and a Planning and Research Associate I, in the Learning Through Technology General Fund account.

Provides that the agreement that provides one-to-one wireless computers for 7th and 8th grade and high school students may occur annually by financial order upon recommendation of the State Budget Office and approval of the Governor.

- 4-134: Language Part E Fund for the Efficient Delivery of Educational Services —
 Repeals Title 20-A, §15754, the Fund for the Efficient Delivery of Educational
 Services which is not funded in the proposed FY 2008-FY 2009 Biennial Budget.
- 4-135: <u>Language Part F Student to Teacher Ratios</u> Amends Title 20-A, §15678, subsection 2 to change the student to teacher ratios from 16:1 and 17:1 at the middle school level and from 15:1 to 16:1 at the high school level to achieve the savings proposed in 4-123 thru 4-125 General Purpose Aid.
- 4-136: <u>Language Part JJ Laptop Computers</u> Amends Title 20-A, §15689-A, sub-section 8 to add the cost attributed to the contracted support services and annual payments for laptop computers to middle school and high school students and teachers as an adjustment to General Purpose Aid.
- 4-137: <u>Language Part KK Lease-Purchase Authorization; Maine Learning Technology Initiative</u> Authorizes the Department of Administrative and Financial Services, to enter into lease-purchase financing arrangements on behalf of the Department of Education for the acquisition of portable computer systems for high school students.

Testimony to the State Legislature Spring 2007

My name is Larry Taub and I am the Superintendent of the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf in Falmouth. I have been asked to appear before this committee this morning to testify as to the merits of the proposed change in the funding of our school from the Department of Administrative and Financial Services to the Department of Education.

As you may or may not be aware, until 2002 the Governor Baxter School for the Deaf was under the direct supervision of the Department of Education and the school board functioned in a purely advisory capacity. In 2000 it was decided to change our school's status in 2002 and we were then designated as an independent quasi-state agency reporting directly to the School Board and in turn, the State Legislature. As such, we have submitted school board approved school budgets and capital budgets to the Department of Administrative and Financial Services. While our status as an independent quasi-state agency has allowed us to flourish in providing statewide and local services for the deaf and hard of hearing students throughout the State of Maine, the funding for our services as a school remains as that of a state agency. The change in our relationship with the State enabled us to provide for more creative leadership and flexibility in the provision of services during the past 5 years and we were successful in addressing funding problems though the state legislature even as demands for our services continues to grow.

However, this year the Department of Administrative and Financial Services in conjunction with the Department of Education has recommended that the funding for these vital services be filtered through the Department of Education similar to all other schools in the State of Maine. This is not to say that our services and programs will be overseen by the Department of Education. That role will continue to reside with the Department of Administrative and Financial Services. It is expected from my conversations with agency representatives that this arrangement continues to recognize the dual role of the organization as a statewide educational agency and special purpose school. As such, it will allow the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf to be funded on par with other schools throughout the state by the collaborative efforts of the Department of Administrative and Financial Services and the Department of Education.

As long as this change will have no bearing on the day to day oversight, which will continue through the school board and administered through the superintendent of schools, enabling the educational mission of the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf to be accomplished as well as the continued reporting of our operational efforts to the Department of Administrative and Financial Services I am in favor of this proposal. Thank-you.

MAINE MARITIME ACADEMY CASTINE, MAINE 04420 207-326-4311

February 22, 2007

Rachel Tremblay
Office of Fiscal and Program Review
5 State House Station
Augusta, Maine 04333-0005

Dear Rachel,

Enclosed are a variety of materials to address those questions which arose during our February 15th public hearing for which the Academy was asked to provide additional information for consideration during committee work sessions.

The first (two page) display identifies specific line items of expenditure in the Academy's operating budget for the past several fiscal years as well as projections for the 2008-2009 biennium. Percentages shown reflect the percentage of total costs for the particular year represented by the individual category of expenditure. As you know, the Academy's state appropriation has always been in the form of an All Other "Grant to Public and Private Organizations" (as is the case with the University and Community College systems). As such, it is actually a subsidy to total overall operations rather than an amount intended to pay for specific operating cost items. In the current fiscal year our state appropriation represents approximately 33.2% of our projected total operating revenue. So, one could conclude that about 33 cents of every dollar spent is a state-funded cost.

Adjustments from the current fiscal year to '08 and '09 are predicated on a variety of known factors and assumptions. For example, salary costs are directly related to our collective bargaining agreements which are negotiated in accordance with the University of Maine Labor Relations Act. Our current contracts provide for a 3% increase for '08 and a further 3 ½% adjustment for '09 (in addition, there are stipulated step increases which average about 2% per year for all employees as a group). It is our understanding that these adjustment rates are comparable to those currently in place for state employees. Most benefit costs increase at the same rates as salaries – except we've used the Bureau of the Budget's 7% per year health insurance premium adjustment projection since our employees are covered by the same plan as state employees. Academy electricity costs are expected to increase by approximately 10% per year for the next biennium as a result of recent rate restructuring. We are projecting increases in fuel costs (both campus and training vessel use) at 20% each year. Most other items of expense are expected to rise in proportion to general C.P.I. growth of about 3% annually.

Our second exhibit compares initial Academy General Fund Appropriation requests since fiscal year 2000 through the forthcoming biennium with governors' funding recommendations and final legislative appropriations. While the Academy has consistently requested state assistance each year at amounts greater than levels appropriated in the previous year, as a result of competing priorities and statewide funding challenges the net appropriations have been less than our original requests – and twice less than the amount provided in the preceding year.

Thirdly, we've included a gender breakdown of Academy employees by category in response to questions in this area.

Finally, we offer student retention data – for all undergraduates and for female students as a subset.

I believe the aforementioned and enclosed materials will address the questions at hand. If you or any committee members would like further clarification or additional information, please let me know and I'll be happy to provide it.

Sincerely,

Richard R. Ericson

VP for Administration, Finance & Governmental Relations

Are you thinking of going to college or changing careers?

The Bangor Adult Education CAFE Program can assist you with the transition.

the following:

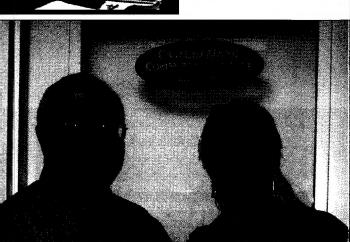

- Low-cost courses (\$30*/40*) in mathematics and writing designed to improve Accuplacer college entrance exam scores
- Low-cost science lab courses (\$40*/50*)
- College and career counseling
- Assistance with applying to college
- Assistance with applying for financial aid
- Experience in the college environment
 - Textbooks extra. Bangor residents pay reduced course cost

CAFE program?

- Current adult high school diploma or G.E.D. candidates
- Past high school or G.E.D. graduates needing to brush up on skills in mathematics, writing or computer applications
- Adults seeking a career change that requires post-secondary education
- College applicants needing developmental courses in mathematics, writing or computer applications to improve Accuplacer college entrance exam scores
- Adults needing to fulfill specific college entrance requirements, such as prerequisite science courses

- Number Skills for College
- Algebra I
- Algebra II
- Computer Applications
- Writing Skills for College
- Anatomy & Physiology
- Biology
- Chemistry

According to a recent government report, adults with a bachelor's degree earn an average of \$23,000 more per year than those with a high school diploma.

- The Boston Globe

CAFE is funded by a grant from the Maine Department of Education.

For more information on the CAFE program, call the Bangor Adult & Community Education Learning Center at 941-6315.

121 York Street Bangor, Maine 04401

CAFE is a partnership between the Bangor Adult & Community Education Learning Center and Eastern Maine Community College.

G.E.D. Preparation and Testing

G.E.D. stands for tests of General Educational Development. The G.E.D. is accepted as an equivalent to a high school diploma by approximately 97% of colleges and universities in the U.S. and 95% of employers because they recognize the G.E.D. test as a rigorous examination equal to or exceeding high school proficiency.

The G.E.D. exam is a your futurel battery of five tests in reading, writing, science, math, and social studies. The tests take seven or more hours to complete.

The Learning Center is an official G.E.D. test preparation and administration center. We can offer you the preparation and remediation to prepare for the G.E.D. at Bridgton Memorial School. Students must first take a pre-test to determine their readiness level. Those individuals who pass may schedule to take the tests. Those who do not pass the pre-tests are required to take remedial instruction to help prepare to take the test.

Please call The Learning Center at 647-5054 to find out more information.

Postsecondary Planning Resources

Education, training, and planning for the future!

SOUTHERN MAINE COMMUNITY COLLEGE

We are indeed fortunate to have SMCC schedule college level classes right here in our community! Check out our Spring '07 brochure in early December for the schedule of college classes held at Bridgton Memorial School. Most of these classes will apply to a wide variety of degree programs at many colleges and universities. Tentative planned offerings are:

ENG 111: English Composition

MAT 050: Introduction to Algebra

MAT 108: College Algebra

PSY 100: Introduction to Psychology

SOC 100: Introduction to Sociology

BIO 111: Biology

BIO A11: Biology Lab

MDA 114: Medical Terminology (on-line course)

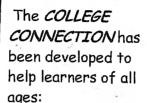

ACCUPLACER™ testing for college readiness is a great place to begin. Call us to schedule a testing time and to get more information about your choices to attend college.

MAINE EDUCATIONAL OPPORTUNITY CENTER

In addition to our own College Connection program and services, A MEOC representative is also available in our community to provide additional services for those interested in pursuing post-secondary education. They offer workshops on financial aid & planning, and can help to answer the many questions related to college search, planning, and success.

You may call The Learning Center for information, or contact our local advisor, Tina McDonald, at 1-800-281-3703. Look for more information about MEOC in our Spring, 2007 brochure, scheduled to be available in early December.

The college connection & career advising

Our world is going global - don't let it leave without youl

- set goals to obtain postsecondary education and training.
- utilize our PLATO lab to increase skills in a variety of areas.
- take classes to help prepare for college or to meet a class pre-requisite.
- enroll in a variety of first year classes offered at The Learning Center through Southern Maine Community College.
- take the ACCUPLACER™, the College Board's college entrance exam, to determine how ready you are to take college level classes.
- brush up on the skills necessary to reenroll in college.
- receive college and career counseling assistance from our full-time career counselor.

Our career counselor will help you develop a plan to make your college goals a reality!

Edda

ON-LINE CLASSES!

NEWI Learners in our community can now access instructor-facilitated on-line courses through Ed2Go. The courses are comprehensive and self-contained. No textbooks are allowed!! All courses are clear, complete, engaging and filled with useful strategies and practical advice. And best of all, there is no worry about your class being cancelled - for ANY reason!!

Each instructor-facilitated on-line course runs for six (6) weeks and consists of twelve (12) lessons. There are over 300 courses and certificate programs in dozens of fields.

All you need to get started is a computer with internet access, an e-mail address and a web browser. Any additional requirements will be listed with the course description.

Shape your Future

Good afternoon, Senator Rotundo, Representative Fischer, Senator Bowman, Representative Norton and members of the Joint Standing Committee on Appropriations and Financial Affairs, and the Joint Standing Committee on Education and Cultural Affairs.

My name is Betty Gundersdorf, and I'm the Director of Lewiston Adult Education. I am here to offer testimony in support of LD 499, the budget request for the College Transitions Program.

Lewiston is one of the original College Transition sites funded by the Nellie Mae Education Foundation. To date, approximately 140 students have completed our program and about 75% of those students have gone on to pursue post-secondary studies. Our current enrollment for Winter/Spring 2007 is 21....the largest semester enrollment in college transitions we have ever had. Our transition program serves a wide range of students from dislocated workers, to people seeking a new career path, to new Mainers.

Our transition program has several goals...all similar to the programs you have heard described today: We provide career guidance. We seek to immerse students in the rigorous work they will encounter at the college level, arming them with study and test-taking skills. We help students navigate the college selection and admissions process so that they end up in a college that meets their needs and their budgets. And finally, we hope to prepare students to be successful on their placement tests-- avoiding the high cost/no credit scenario of developmental studies.

College transition programs are important to the state of Maine and very important in Androscoggin County. *College for ME...Androscoggin*, a regional arm of the statewide College for ME initiative, is a bold initiative with a goal of doubling the number of college degree holders in Androscoggin County over the next 10 years.

In our county, only 16% of working age adults have at least a BA Degree (25% in Maine and 34% in New England). Only 24% have at least an Associates degree (33% in Maine and 42% in New England). Twenty percent of our county's population doesn't have a high school diploma. Lower educational attainment in Androscoggin County correlates with lower per-capita income, lower median household income, and slightly higher household poverty rates than in the state as a whole. We need college transitions funding to build a world class workforce and a thriving economy.

Lewiston's College Transition Program is flexible enough to meet a variety of needs. It is cost-effective and it dovetails effectively and efficiently with other learning opportunities under the Lewiston Adult Education umbrella. And finally, it works. I urge you to fund LD 499.

Thank you.

Lewiston Adult Education Comments from College Transition Program Graduates

Students speak about the College Transition Program in words that are poignant and eloquent.

From Raghda S. (January 26, 2007)

...I have good news.... As you know I was told that I'll have to take the ESL II course at CMCC before I enter any major. When I met my advisor, he said that I don't need to take this course because my score is already up to 100 in the ESL test and I can go directly to the major I want. So I'll start this Thursday as a General Studies student and then I'll transfer either to the Nursing Program or Radiologic Technology. I know that you are happy for me and I would like to thank you again and again for what you did for me.

From Nova F. (November 26, 2006) Currently enrolled as a freshmen in UMA

....Only having passed the ninth grade, I had a lot of college preparation to do. At the time of meeting her, I did not even have my G.E.D. Ann Marie gave me the knowledge and skills to help me with my biggest life challenges....I accomplished more than I could ever imagine: great self esteem, awesome study skills, the academic preparation that I needed...

From Donna P. (August 16, 2006)

...I did it. My new score is 111.8 and the percentile is 95. CMCC told me to bring a dictionary. I did, but I didn't need to use it... not once. I already e-mailed my advisor about changing the English class to College Writing. I couldn't have done it without you and I thank you very much....

From Melanie T. (August 2, 2006)

Hi, Ann Marie. Guess what? With your help I brought my score on the writing portion of the placement test up to a 7, and my math score went from a 33 to an 88! Now I can change my major. Thank you.

And again on (November 4, 2006)

...Everything is going extremely well! I am taking 3 courses this semester: Approaches to Art, Ethics, and College Writing. I have earned an A on every essay I have written in Art. My lowest grade is a B in Writing. In Ethics I had the highest grade in the class on our last test.... I am enjoying every second. I am glad I waited till I was older because I do not think I would have taken it as seriously when I was 18. Spending the summer in your classes helped tremendously. I was nervous to go back to college, but it seems I am a lot more prepared than most. I even changed jobs. Instead of bartending, I am now working at a florist's shop. The skills I learned in your class are also helping me to study for my Florist License...

Good Afternoon...

First of all, I would like to say that along with Lewiston Adult Education, the College Transition Program was a big key to my furthering education.

At 17 years old I was a high school dropout who only had completed freshman year. I didn't want to be stuck in the never ending cycle of failure anymore. I then enrolled in the GED program. I wasn't there long – it was quick. When I finished my GED I was informed of a College Transition Program. This was described as a class to get you ready for college. I knew that I wanted to go, so I enrolled.

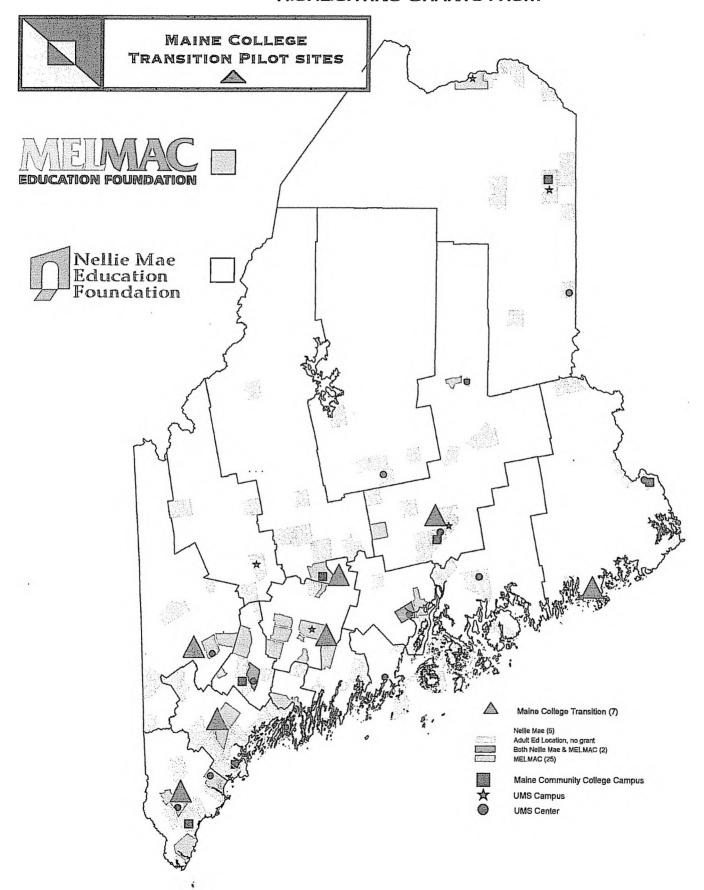

This program, for me, was more than just learning the basics of math, reading, and writing; it was so much more. Because I left high school after ninth grade, I missed important classes – I had some catching up to do. I learned how to build confidence in myself and ways to be successful. These things have helped me not only in college but in life as well. The College Transition Program gave me the boost I needed!

Now, I am in my second year at CMCC working on a medical assistant degree and it's going well. I still benefit from this program, because if I need help with my school work, my teacher is right there to help. This program has helped me more than I can describe. I feel that this is a very beneficial piece for people like me if they would like to go to college. I hope you will fund LD 499.

Senator Rotundo, Representative Fischer, and members of the Appropriations

Committee, and Senator Bowman, Representative Norton and members of the

Education Committee,

I'm Shanna Barbour, a student enrolled in the College Connections program through MSAD 61's Adult & Community Education Program.

My journey started one night just after my eldest daughter and I filled out *her* student aide paperwork for college. I began thinking how my life had changed. Over the past two years I had over come great obstacles, bettered the life of myself and my three children. Was I ready for more? When I made the decision to go back to school I looked at what was around me and where I live....not much. Then I saw something in Bridgton - The Learning Center, just down the road from me! I called the number, all the while my hand shaking from nerves. Then my call was answered by Tami. She was so kind and helpful right away I felt a bit calmer. I remember thinking," Okay Shanna you made the call... now what??" On the line I hear, "This is Madelyn, what can I do to help you"?

I told her that I wanted to get back into school to get my RN, that I had my GED and had been out of school for sometime. I asked if she could help me get started on the right track. With The Learning Center the only place around, I had hopes she could help me. Madelyn began to tell me what she thought would be best; first to come and take the ACCUPLACER, and then we would go from there. I felt so confident that I went the next day and took the ACCUPLACER. The results identified where I needed to remediate to

begin college classes. I was ready for college English, but needed some help to prepare for college algebra. We set some goals, short term and long term, and in doing so this school with its great staff and resources made it possible for me to began needed classes the next day. I needed high school chemistry, and The Learning Center was just beginning its spring semester classes, so I wasn't too late to enroll. I enrolled in the PLATO lab to work on my math skills.

Then we worked on my strategy to complete my prerequisites, and I'm on track and feel confident I'm taking the right steps to be accepted and successful in the nursing program down the road. I enrolled in the SMCC General Studies program, and I'm on the waiting list for Nursing program. I know that if I didn't have the College Connections program through MSAD 61's Adult & Community Education Program, and its wonderful staff, I would not be where I am today.

Thank You

Senator Rotundo, Representative Fischer, and members of the Appropriations Committee, and Senator Bowman, Representative Norton and members of the Education Committee;

I am Takfoon Hawkins, a student enrolled in the College Connections program through M.S.A.D. 61's Adult and Community Education Program. I should start by giving you some of my background, so you will see how I arrived at The Learning Center.

I was born in Hong Kong, China in 1958 and was the youngest daughter in a large family of 10. Neither my Mother nor Father had any formal education past the elementary school level. My Father worked long hours to support our large family. As a man without an education he did not make much money. As soon as I became old enough to work I was asked to quit school in order to help support the family. I worked full time and attended high school in the evening. I immigrated to the United States in 1979 with my first husband who was a U.S. citizen. Together we had two children, and shortly after my second child's birth we got divorced.

Overnight I became a single, uneducated, unemployed mother of two. I worked many jobs to take care of my kids and thought that's the way it would remain; endless hours and low pay. I tried different formats of educational programs to suite my schedule and was unable to understand the different programs. So I focused on hard work to take care of my children.

In 1999 I met my true love and we married shortly after. He challenged me to "try" and taught me that anything is possible if you have the desire and

the resources in place to help you. In late August, 2006, I responded to a course booklet that I received in the mail for The Learning Center in Bridgton. It was one of the best decisions that I ever made.

The Learning Center provided a tremendous amount of support and educational resources to me, including G.E.D preparation, goal setting, college planning, financial aid information ACCUPLACER testing, remedial instruction in their PLATO lab and personal support. Without all of this support I would not have been able to obtain my G.E.D and be on the track that I am on today. I am currently a student at Southern Maine Community College in the General Studies program studying to become an elementary school teacher.

Senator Rotundo, Representative Fischer, and members of the Appropriations Committee, and Senator Bowman, Representative Norton and members of the Education Committee,

I am Madelyn Litz, Career Counselor for the Adult Education Program for MSAD 61. I came on board with my District last year, and was fortunate to be involved with the submission of our Transition grant proposal last spring. We are proud to be a pilot demonstration site and feel we have learned a lot while addressing the needs of the members of the communities we serve.

Because of the rural nature of our region, and the distance that learners would have to travel to One Stop Career Center services in either So. Paris or Portland, we feel our program is of great importance to the citizens in our area who are interested in pursuing their high school diploma, GED, or training and education beyond high school. The Transition dollars allow us to offer services to our clients that include goal setting, career and college research, preparation for the rigor of their post-secondary education and training, and assistance and support to take that critical first step towards a degree or certification at the college level.

Providing these types of support, and offering scholastic skill remediation opportunities for clients, enhances the likelihood of their success. Because of these transition services our clients feel confident to enter post-secondary programs. The Learning Center, the actual facility at which these services are provided, also allows access to the other programs that support our students: child care, Healthy Families, PROP, SMCC, USM, and enrichment classes through Community Education.

We know there are many in our community who are candidates for our College Connection transition program, and our marketing strategies help us identify them. Our local Chamber of Commerce and affiliated businesses, our local high school, and ongoing advertisement of the services we provide continues to catch the attention and interest of the people who need our programs the most.

We encourage our students to learn more to earn more. Promoting and maintaining our College Connections transition program is key to that objective.

If you do not have any questions, we have two students from our program that would like to address this distinguished panel.

February 12, 2007

Remarks for the Governor's budget proposal that includes the college transition program delivered by 30 adult education programs throughout the state:

Presented by Rob Wood, Co-Director, Portland Adult Education, Portland Public Schools

I encourage you to support this Adult Education effort that will increase support for the College Transition efforts by thirty of the more than 100 adult education programs throughout the state.

Adult Education programs have always supported adults to prepare for heir futures. We offer the opportunity to earn high school credentials: the high school diploma and the GED. Last year we conferred 3,108 of these credentials. The funding for this is called the adult education subsidy. But we can do more.

Currently 9 adult education programs receive specific state support to offer these college preparation courses and advising opportunities. This legislative support for College Transition will expand the effort to 30 programs. This will more than triple the number of adult education learners who will be able to access and succeed at college. We, as a state, need more college educated citizens and this program will provide these opportunities.

In Portland last year we conferred high school credentials to 226 adult learners. More than 70% of these learners stated that they earned the credential so they could access college. We should celebrate that. Currently, in this winter semester, 86 learners are enrolled in algebra, college writing, and science courses so they can successfully access college. Many of these learners already have a credential but they still do not have the skills to enter college level courses. The Governor's bill would support their efforts.

Studies have shown that 80% of the employees who will be in our workforce in 2016, are already working. We need to support them. We need to provide a pathway to higher education. A survey conducted by Lynn Miller of the Southern Maine Partnership studied the relationship between college remedial courses and college graduation. She found that within the UMS system,

- > that a learner who took one remedial class had a 34% chance of graduating within 6 years
- > that a learner taking 3 or more developmental courses had an 18% chance of graduating within 6 years.

Many adult education programs- more than the ten currently that receive state funding - offer courses and support to adults who want to access <u>and</u> succeed at college. Last year 2,558 learners registered for adult education courses specifically for college preparation. These learners are learning the prerequisite skills often taught in developmental courses at more distant college campuses. Learning for your future in your community is the smart way to go.

The College Transition program through Adult Education provides an economical, efficient and effective plan to accomplish the goal that more of our citizens are prepared for our new economy.

Please contact me at anytime if you have a question.

SPECIAL COLLEGE TRANSITION SUPPLEMENT FROM THE MAINE ADULT EDUCATION ASSOCIATION

SPECIAL SUPPLEMENT

This special edition of the MAEA Media was developed to honor the adult students who continue to make Maine's College Transition programs successful. Their inspirational stories of academic and vocational success fill the pages of this very unique issue. I am certain that you will come away from this issue feeling proud of the profound work you do each day. How rewarding it is to read about student successes across the State of Maine - all as a result of their College Transition commitment!

This edition also provides adult educators with vital information regarding the history of Maine's College Transition Program. Cathy Newell details the long and passionate road that resulted in the implementation of the Maine College Transition program with the passage of bill LD1785 in 2006.

COLLEGE

Enjoy reading about all facets of the Transition Initiative and thank you for all that you do!

The Maine Adult Education Association is a professional organization that advocates for adult education locally, statewide, and nationally and supports its members in order to meet the educational needs of Maine's adults

COLLEGE TRANSITION -Working for Maine-

Judy Ruszczk enrolled in the Rockland College Transition program in fall of 2004 after 25 years out of school. She wanted to return to the nursing profession but had no idea how to even gather her transcripts to begin the application process. In addition, she had low self-esteem and needed a support network in order to help her overcome her self doubt. Judy enrolled in our program and was a very dedicated and strong student. She was a peer leader and an incredible inspiration to other students.

Judy had been a Licensed Practical Nurse (LPN) for over 20 years. But after suffering intense personal and family tragedies, Judy began to drink. After losing her job, the most beloved part of her life, she moved to Maine and embarked on a sobering journey. Sober for nine months, Judy enrolled in College Transition to ultimately fulfill her goal to become a Registered Nurse. Upon successful completion of the Transition program, Judy spent the following spring and summer

semesters working to complete her Nursing Program pre-requisites. She took Anatomy & Physiology, Public Speaking, Chemistry, Algebra, Micro Biology and an LPN to RN Transitions course - all in the span of two semesters! Judy was fast-tracked into the 2nd year of the Nursing Program due to her intense commitment to the program and because of her former work as an LPN. She earned a 3.4 GPA and graduated from the school of nursing. She is now employed as an RN in Maine.

Patty Provost of Sumner College Transition Project, Summer 2003
Patty was 38-years-old and a single parent because her husband was in federal prison out of state. She attended the Transitions Project during the summer of 2003. For the first five or six weeks of class, Patty was convinced that college could never happen for her and

she was shocked to be accepted, stunned to receive adequate financial aid, inspired after talking with her prospective advisor. Starting her AS in Crim' Justice at University College at Bangor (UCB) that fall, Patty is now earning her BS, with consistently strong grades. She started a legal research business with a professor and, developed a lending library program at the Penobscot County Jail. Her family is back together and Patty continues to actively contribute to her family, her school, and her community. Patty is quite the inspiration and has a bright future!

How My Life Has Changed because of the College Transition Program: I no longer have to work two minimum wage jobs.

I now have the ability to choose the work I wish to pursue.

I no longer receive food stamps.

I can purchase my own food without help from the state, local or federal government. Because of this I can shop without the stigma of people thinking I'm a lazy, no good bum.

I no longer receive fuel assistance. I choose and purchase my own energy source.

I no longer have to hide disconnection notices from my children because I am able to pay my bills on time.

My children see a mother who works hard and comes home at the end of the day happy instead of a mother who works hard and comes home at the end of the day worried, frustrated and

SHARED STORIES of SUCCESS College Transition Students throughout Maine

 Tina, a 42-year-old single parent, had just left an abusive relationship when she started our Transition Project in the spring of 2002. She worked as a private housekeeper, cleaning several homes to support herself and her school-aged daughter. Shy, yet determined, Tina completed the Project and started University of

Maine in Augusta part-time that fall. <u>Tina is now a full time Ed Tech for her local school with benefits and a full sense of pride in her accomplishments!</u>

- Lynn, 35, completed the Transitions Project in the Summer of 2000.

 Overcoming early academic challenges, Lynn developed a kind of savvy that allowed her to progress onto the eligibility list for a restricted AS/BS at UC-Bangor. Lynn had to stop-out for a year to wait for her degree slot, but graduated in 2005. Lynn is now a Dental Hygienist in the Ellsworth area.
- Yvonne, 47, a single mother and laborer joined the College Transition program in Rockland and gained up enough confidence to take the ParaPro assessment and pursue her dream of becoming an educator. She passed the test and worked as a special and regular education substitute in the mid-coast. She will start college in the fall of 2007 along with her <u>full-time EdTech position</u>.
- Johnny, a 32-year-old Navy veteran, had been working at the Winter Harbor Navy Base, when it closed and he became a dislocated worker. Johnny received release time in the spring of 2002 to attend the Transition Project, and then started at Eastern Maine Community College. Johnny completed his A.A. in Liberal Studies and transferred it into University of Maine Augusta's B.A. in Social Sciences with a psychology focus at University College-Bangor. Johnny graduated with his B.A. in 2006.
- Angela, 31, a young mom and wife from Harrington, completed the Transition
 Project during the summer of 2001. Determined to become a nurse after her best
 friend died of breast cancer, Angela started at UMaine Machias in the fall of 2001 in
 Liberal Arts with a focus on pre-nursing. She also worked on the Beth C. Wright, Cancer
 Resource Center project in Ellsworth and as a CNA at a local nursing home. Angela
 graduated in May 2005 and is a practicing Registered Nurse in Washington County.
- Cheryl, 42 and newly divorced, needed to make a living to support her evergrowing family. The State of Maine permanently placed her twin infant grandchildren in her care due to drug-abuse issues of an older son. She did not allow these additional physical or emotional demands to keep her from continuing with her degree. Needing to relocate her family to Florida to escape on-going abuse issues, Cheryl is currently pursuing her degree to become an Elementary Teacher at Central Florida University.

The Transition Program - A Template Overview

The Transition Program Template is a set of recommendations based on national college transitions experiences and the input of all seven currently operating Maine ABE-to-College programs funded by New England Literacy Resource Center Nellie Mae Grants.

1. What makes a good College Transitions program?

<u>Program Identity</u>: A significant factor in program success and continuation is an identifiable program name or service in the community that sets it apart from the regular adult education offerings. This could take the form of a location for services, a separate flyer or specific advertising and/or specific staff identified as working with transitions.

2. What should be the first priority of any College Transition Program?

Accurate Identification of Student Needs:

This statement encompasses academics, building (student) relationships, identifying strengths and weakness of students, career goal setting, rigorous academics and developing personal responsibility and should be viewed as an overriding priority for the application of any counseling or academic program to follow. Individual portfolios and accurate tracking and record keeping are essential elements.

3. What best practice needs to be promoted and implemented in any new College Transitions program?

A "defined process" needs to include elements of program design to include:

- a) A formal process for intake, orientation and graduation
- b) Accuplacer testing on site
- c) A formal process for <u>portfolio development</u>
- d) A defined data collection process, include documentation of assessment and follow up
- e) A staff development component for teachers and counselors

In summary, the best practice would be a defined, replicable design that could be implemented at local programs in varying levels of intensity dependent on regional needs.

4 Based on <u>your</u> experience, what advice would you give to someone starting a College Transitions program?

Individual Program Staff Responses:

- f) Spend time on planning
- g) Review existing research on Transitions
- h) Visit existing projects
- i) View Transitions as part of a continuum
- j) Build linkages with colleges
- k) Establish a local identity
- l) Be flexible, be patient
- m) Celebrate success

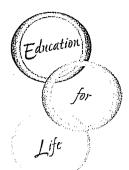

This Template is the summary result of a Meeting of the Nellie Mae Maine ABE-to-College Transition Programs, Lewiston, Maine, January 26, 2006. <u>In Attendance:</u> Roger Dyer, Gloria Berube, Ann Marie Villote, Rob Wood, Connie Patton, Sally Daniels, Darrell Gilman, Shannon Parker, Deepa Rao and Patrick O'Regan.

The Road to LD 1785

- <u>1989 Advent of University of Maine's ITV system</u> with high school sites often managed by adult education in local high schools. Use of Perkins funds for a small number of courses and college counseling on a limited scale.
- <u>1990's Attempts at collaborative agreement</u> with University of Maine System and adult education. This was never completed due to personnel changes
- <u>1999 "Outreach Proposal" by King administration.</u> Never really developed into a bill, but would have funded a few programs.
- <u>2001 Nellie Mae Foundation</u> came on scene with ABE-to-College Grants, eventually expanding to seven sites with the goal of developing a model over five years with \$40,000 per program per year.

- 2002 Collaborative Agreement signed with Maine Community College System and Maine Adult Education Association. Similar agreement with UMS was in development but, again, personnel changes prevented completion.
- <u>2002 and 2004 The Betterment Fund</u> provided small grants to fund a conference in both years to educate adult education programs and post-secondary partners on College Transitions.
- <u>2003 Maine Compact for Higher Education</u> identified Adult Education College Transitions as one of five key strategies to increase the number of adults with college degrees in Maine. The goal of 40,000 new degrees cannot be reached without adults.
- <u>2005 Lumina Foundation</u> provided funding for leadership in moving to a state-wide program. Curriculum development, assessment of program readiness, coordination with community colleges, and MOU's between CC campuses and adult education programs.
- 2005 Governor's PreK-16 Committee identifies adult education as a key link.
- <u>2005 MELMAC Education Foundation</u> added adult education to their grant program. 24 programs are involved with exploring specific aspects of the MELMAC model with relation to adults. \$4,000 per program per year for 2 years.
- <u>2006 Senator Libby Mitchell</u> identified Adult Education College Transitions as a critical strategy for education and economic development in light of plant closings and the changing nature of the Maine economy and agreed to sponsor it. Legislative Council accepted the bill for the 2005 session.
- 2006 The Education Committee voted Unanimous Ought to Pass for LD 1785 and \$200,000 was appropriated for the initial six sites, with funding for a 7th secured Ready from the Betterment Fund, and a grant from the Nellie Mae Foundation for program leadership.
- <u>2007 Maine College Transition was begun</u> with strong legislative support with a \$200,000 appropriation and the passage of LD 1785 outlining the plan to expand the program in the future.
- 2007 <u>In his budget, Governor Baldacci moves to accelerate</u> the Maine College Transition program to full implementation of 30 sites. Pilot sites substantially exceed enrollment projections for the first semester.

Rockland, Maine has been a College Transition site for five years. As an administrator for the program, I have witnessed, first-hand, the undeniably positive effect our preparatory program has on adults who would otherwise not know how to begin to pursue post-secondary education.

Our seamless collaboration with local University College administrators allows us to work with students to help them succeed once they enroll in college classes. It is a fact that students who attend a Transition program prior to attending college are better prepared academically, culturally and are more financially savvy and responsible regarding financial aid.

We met a **60-year-old woman** seven years who was **reading at the first-grade level** and yet was determined to go to college. Because of our integrated partnership with Literacy Volunteers of Mid-Coast Maine and a Nellie Mae Transition site, our center provides a continuum of services from basic literacy to college preparation. This ambitious student is **now attending her second year at Kennebec Valley Community College** and owes her success to the Transition program which helped her to reach her goal in the last two years.

CP, a young man **formerly living on SSI** and feeling depressed that he wasn't doing anything in his life now works part-time locally and **attends college in Thomaston full-time**. He credits his vocational and academic success to our center as he **earned his high school diploma**, enrolled in Transition classes and networked through our job-skills program to find **work in his desired field**. He will be a chef someday, but for now enjoys his studies and working in the kitchen of a local restaurant.

These are but two examples of the students whose lives are forever changed and exponentially improved due to their enrollment in our Transition program. Across the state, Transition programs give adult students a place to begin their post-secondary journey.

Dear Senator Rotundo, Rep. Fischer, and members of the Appropriations Committee, and Senator Bowman, Representative Norton and members of the Education Committee;

My name is Kathi Medcalf and I am the Director of Sanford Community Adult Education (SCAE), and we are a recipient this year of a College Transition Grant. I am writing to encourage you to support the College Transition money in the Governor's budget.

Sanford's Program is called: The ROAD to College. ROAD stands for "Removing Obstacles Achieving Dreams". The program is designed for people who are thinking about going to college, but aren't sure where or how to start. Going back to school can be a scary decision and having some support along the "ROAD" can make a huge difference for people. The program is designed to help people enter the "ROAD" from wherever they are, and help them continue on to college, with appropriate course work, in Mathematics, English, and Computer skills. Benefits of the program include:

- Placement in classes that will increase skill levels in order to prevent remediation classes in college,
- Fee waivers for classes at SCAE,
- Free daytime childcare,
- Career and college counseling,
- Upon completion of the program up to a \$500 scholarship to be used at YCCC or UC Sanford.

Sanford's "The ROAD to College", Removing Obstacles, Achieving Dreams, a College Transitions Certificate program began in September of 2006, since that time over 125 people have taken classes as part of this program. Articulation agreements have been made with York County Community College (YCCC) so that when a student completes "The ROAD Certificate", by receiving grades of 80% or better in each class students will receive: GEN 100 Credit at YCCC, and placement out of YCCC MAT 091, 097 and ENG 095 the remedial classes.

Many of our non-traditional students are using their financial aid to pay for remediation in college. We need to direct those students to adult education for cost effective programs to give them the skills they need to succeed. Math is a stumbling block. Adult Education programs offer small classes, and classes at skill levels designed to help adults fill in the gaps of their learning.

The College Transition program helps support students by building their confidence and helping them learn the skills they need to succeed. I encourage you to keep the Governor's level of funding for this program.

Sincerely,

Kathi Medcalf

Governor's Budget, February 16, 2007

()

SANFORD COMMUNITY ADULT EDUCATION SPEAKS...

Dear Senator Rotundo, Rep. Fischer, and members of the Appropriations Committee, and Senator Bowman, Representative Norton and members of the Education Committee:

...I have been out in the working world for 20 years. Last year I decided that I wanted to go to college. When I was searching for an adult ed. program I couldn't find a school that could cater to all of my needs. SCAE is what I was looking for. The staff here is very helpful and caring. I feel like every teacher takes my education personally.

I think that my time here will help me for the rest of my life and I will never forget how helpful everyone has been. I have applied to go to SMCC for the fall of 2007 for the HVAC program. I feel like coming to SCAE has helped me get the level of education that I need to achieve my goals.

Sincerely, James Wakefield

...I wanted to say a few things about the the adult education system. First of all, it is imperative that the adult community have the resources to further their education. Adults, who are in fact improving themselves, are committed and enthusiastic about education. We are not children trying to hide under the radar in a high school, but people who have come to realize that we will NEVER amount to anything unless an education is pursued. We are not satisfied with merely, "getting by," we want to flourish, and give our families the opportunities they deserve. Adult education sets an amazing example for our children, saying education must never stop! Adult education must continue to be available. It must continue to be affordable. Our promise to you is an educated, more efficient, productive community, waiting for our opportunity to just put ourselves out there and give it all back.

I sincerely thank you for the opportunity to be where I am, I will not disappoint you.

Yours Truly, Amanda Peters

...I came to this school because I dropped out of the high school because I started to go down hill in the high school and I started to miss school. I have been coming here for about 9 to 10 months and enjoy it very much. I only had 4 or 5 more credits to go and now I only have the two classes to do which I should be done in April. Now I am going to be able to walk with the class in June. Because of this school I am graduating and going on to YCCC in September. This school is also letting me take refresher courses here so I can go on to the college and start right off at the college level.

Thank you, Danielle Alexander

CARIBOU COLLEGE TRANSITION

Dan MacDonald, Caribou Director of Adult Education

The Caribou Transition program (Nellie Mae funded) has enjoyed many wonderful success stories with students going on to college and making better lives for themselves and their families. I cannot express passionately enough how important this program is to the to these students in giving them the self-confidence and support they need to make the transition to a higher education. To help with this, I would like to offer the following testimonial from student Colette Cormier. She explains through her experiences how Caribou Transitions brings together multiple resources to provide an all-inclusive, one stop program to help ensure student success.

Colette Cormier: Caribou Transition participant

I would like to take this opportunity to tell everyone how much the Trio program, Maine Educational Opportunity Center (MEOC) and the College Transition program, Caribou Adult Education and Maine Educational Opportunity Center benefited me in my time of need. The programs and the people involved gave me courage, self-confidence and above all else the extra education I needed to begin a new phase in my life.

Before beginning the College Transition program, I was employed as a human resource coordinator for a local business. In April of 2003 my husband who was the primary bread winner of our family sustained a back injury. We were uncertain of whether or not he would return to work. In August of that same year, the company I was employed at went out of business. I wasn't sure what to do with my husband out of work. I thought I would be able to get a job. I sent out several resumes but to no avail. I didn't receive even a phone call for an interview since I didn't have a college degree. The experience I had was not enough to get me into a job that would begin to cover what my husband was previously bringing home for wages.

In September of 2003, still uncertain of my path, I began to attend the College Transition program. I can't say that it was easy going back to school after so many years of being out of school. The counselors at the College Transition program gave me the courage to not only begin my new phase, but helped me whenever I ran into any stumbling block. Believe me there were many!

The counselors as well as MEOC helped me obtain high school transcripts and fill out the necessary paper work to apply for college. Without them, I'm quite sure the transition would not have gone as smoothly as it did. They gave me the self-confidence I needed to continue onward even when I wasn't sure what I wanted to do. I just knew that if I was going to possibly be the primary wage earner in my family that I would need to make more than just minimum wage.

The class curriculum gave me that little extra push so that I was able to pass all of the placement tests and not be required to take any PBS (developmental) courses. Without

the class preparation and test preparation they gave us, I don't believe I would've passed any of them. Being able to practice what was going to be given as well as just knowing what to expect gave me the confidence and preparedness that is needed when faced with a new environment.

The tutoring and workshop sessions offered by MEOC were equally important to my new role as a student. There seemed to always be new forms to fill out and more information that was needed by the school that I wanted to attend. Without the counselors, who already know "the ropes" so to speak, I may have completely given up just do to the shear size of the mountain of paperwork that was in front of me.

During my first semester at college, the counselors continued to provide me with assistance. Whether it was to just listen to how hard it was or just to say how proud they were of me, this just kept boosting my self-esteem. They also provided me with a mentor from their program that was already attending the same university that I was. Just knowing that I could call on someone or meet someone at the college was tremendously helpful. I believed it was so helpful that in my second year, I volunteered to become a mentor for someone else that had completed the program.

Even after my second year in college I was still utilizing the services provided by the Trio program. I would still attend the financial aid workshops because even though they should become easier every year, they really don't. If you have changing information annually it can sometimes be tricky to complete the forms. Luckily the counselors that are provided by the Trio program are well educated and committed to the students that need their assistance, because without their expertise and guidance I'm not sure that I wouldn't have given up when things did get tough.

I am now a junior at the University of Maine at Presque Isle. I have maintained a 4.00 average the entire time I have attended the university. Due to my grade point average being the highest of all the juniors during my junior year, I received the Daniel Paterson scholarship. It was a great accomplishment for me!

Collette is on target to graduate as class valedictorian. She is too modest to mention that she is also the mother of two teenagers who require time and attention daily. She is a regular guest at our Orientation sessions; urging potential students to take advantage of the Abe-to-College Transition opportunity

M.S.A.D. #49 Adult and Community Education

Eight School Street Fairfield, Maine 04937-1370

Patricia Theriault, Director

February 12, 2007

Senator Rotundo, Rep. Fischer, and members of the Appropriations Committee, and Senator Bowman, Representative Norton and members of the Education Committee,

Dear Legislators:

I have been involved in adult education in the state of Maine since 1987, first as a teacher and for the past nine years as the adult education director in MSAD #49 in Fairfield. We have always believed that part of our mission is to help adults become college ready but without state funding for college transition activities, we were limited in how much we could do.

Two years ago we received a small MELMAC grant to provide college transition services and to do follow-up surveys of our graduates. This year we built on that foundation with one of six \$30,000 college transition demonstration grants.

The impact of this funding has been huge. No adult can read our brochure, take a class with us, or enter our building without constantly being exposed to information about college. With the MELMAC funds we were able to raise awareness; with the college transition grant we have been able to provide programming for adults needing academic preparation. Our activities include:

- In collaboration with KVCC, we created KV Academy, a college prep program for adults. Adults in this program have an identity and a goal: they are on their way to college.
- We offer developmental classes in writing, math, and college prerequisite classes such as algebra, biology and chemistry.
- We offer counseling services and a mentor program.
- We offer Accuplacer testing (the placement test used by KVCC and UMA).
- We host numerous college planning events before class in the evening where our learners
 are able to get tips on topics such as financial aid and study skills while meeting staff
 from the local colleges.

This year we are serving 56 adults in our college transition program. Each one of these adults has expressed an intent to enroll in college within the next year. Each one of these adults is taking concrete steps toward enrollment. Each one of these adults will help increase the percentage of college graduates in the state. Each one these adults will contribute to the economy. Each one of these adults will be the start of a tradition of college attendance in their families.

Last semester, 68% of our college transition students indicated that neither of their parents had attended college. Not only do they face enormous hurdles in going through the college application process for themselves, but without that college experience they also have problems in helping their children access college.

We have demonstrated that college transition funding for adults does make a difference. Recently the MELMAC foundation reported a 58% increase in the college attendance rate of adults after only one year of the MELMAC grant. We ask for your support of this budget which will continue state funding for current college transition programs and allow more adult education programs to provide college transition services.

Sincerely,

Patricia Theriault Director

Bangor Adult & Community Education 885 Broadway Bangor, Maine 04401

February 14, 2007

To: Senator Rotundo, Rep. Fischer, and members of the Appropriations Committee, and Senator Bowman, Representative Norton and members of the Education Committee:

I am writing to urge you to support the College Transition component of the Governor's budget. Bangor Adult & Community Education is one of the College Transition grant sites this year. The CAFÉ (College Access for Everyone) program has helped dozens of students get started on realizing their goal of attending college.

During this initial year, Bangor Adult & Community Education has partnered with Eastern Maine Community College to offer inexpensive developmental courses in writing and mathematics designed to improve Accuplacer placement scores. EMCC has agreed to allow us to offer the courses on their campus. This enables the student to become familiar with the college setting before enrolling in college.

College and career counseling are key components to the CAFÉ program. Our guidance counselor meets with each G.E.D. candidate to discuss college and career options. Some students have not even considered college as an option. Our counselor has opened the eyes of many students that college is a possibility. He assists the students with the selection of an appropriate college path, the completion of applications and with the FAFSA process. This would not be possible without the College Transition grant.

Through the first semester, over 100 people have utilized the CAFÉ program by either taking prerequisite college classes or by utilizing the counseling services. It is my understanding that the other pilot sites are also enjoying success. The Governor's budget for College Transition will provide the resources for even more adults to attend college. I urge you to support the College Transition initiative.

Sincerely,

Gregory Leavitt, Director Bangor Adult & Community Education

Testimony of Sally Daniels Concerning LD 499 Budget Request for College Transition 2-16-2007

Sumner Adult Education's statistics continued:

This represents an ideal college retention rate of 100% at this point in the academic year, explaining why MEOC is so supportive of the Transitions initiative. The MEOC overall retention rate in 2006 was 64.2%, which is considered outstanding by the US Department of Education. HigherEdInfo.org presents relevant comparative data by listing the 3-year graduation rate for Maine's 2-year institutions at an average of 40%. (1) Based on available points of comparison, Sumner's 100% retention rate at the 1st year stage is exactly what Maine needs to build a stronger workforce.

(Sumner Adult Education has been funded to annually provide college transition services to 30 students since 2000; the current Nellie Mae Education funding support ends 12-2007)

Thank you for this opportunity to advocate for the continued growth of the network of College Transitions Projects. College Transitions is an absolutely crucial part of a plan to build the number of adult degree holders in our State.

Respectively submitted, Sally Daniels, Director of Project Services, MEOC Counselor/Instructor, Sumner Adult Education

(1) From Support Early College Success – Key Facts, MELMAC; HigherEdInfo.org: reflecting the class entering in 1998 and graduating by 2001; (data is from all Maine's Community Colleges plus Andover and Beal Colleges)

Testimony of Sally Daniels Concerning LD 499 Budget Request for College Transition

2-16-2007

MEOC, an educational outreach program of the University of Maine under TRiO funding through the Higher Education Act, annually assists 2500+ Maine adults with college planning and access services. MEOC actively walks next to prospective 1st generation/low income adult college students, providing college planning, readiness referral, admissions and financial aid assistance, annually placing 600+ adult students in college.

MEOC actively collaborates with Adult Education programs around the state to connect Project participants with academic enrichment ranging from brush-up and pre-requisite course completion, to college transitions project participation. Maine's Adult Education Programs are essential partners in MEOC success because of the number of Maine's adults in need of transitional services at the various levels. Analyzing data from the 2005-2006 MEOC service delivery database, of the 2622 Mainers receiving MEOC services, 631 enrolled in PSE. Of our participants preparing for college, 1275 were referred to adult education for a range of services. Of the participants referred, 610 enrolled in Adult Education, of which ~ 160 participated in a College Transitions Project (or a First Steps Project). The other 450 were largely in non-College Transitions regions of the state and could have benefited from this valuable holistic college readiness and access opportunity.

College Transitions graduates tend to access college at higher rates than students participating in general brush-up and pre-requisite course services. College Transitions Project graduates have been successfully integrated into the college environment and have the skills and confidences essential to college success. Because of their on campus experiences through the Transitions Project, the students have received stronger advising services; because of the required study skills and college awareness components of College Transitions, the students better understand what will be expected of them and how to approach their classes; because of the academic enrichment activities in the areas of math, reading, writing and computer skills, Transitions students are far less likely to need developmental studies.

Let me back these statements with numbers. Because of my role as Counselor and Study Skills/College Awareness Instructor for the Sumner College Transitions Project, I can clearly discuss Sumner's numbers:

During 2005-2006 year, Sumner Adult Education was funded to serve 30 College Transition students:

34 students enrolled

24 of these completed their College Transitions semester

20 of these enrolled in PSE

All 20 continue their PSE enrollment today

The Maine Adult Education College Transition Program

A cost-effective, proven approach to help more Maine adults transition to college and earn degrees, by expanding the capacity of the Adult Education programs.

10,000 Maine adults with college degrees in 10 years

It is imperative that there be a significant increase in the number of working-age Mainers with 2-year and 4-year college degrees. If more Maine workers earn degrees, Maine will be more competitive in the global economy and workers will earn more. (Maine Compact for Higher Education)

A cost-effective way to help more adults earn college degrees is to expand Maine's public school-based adult education programs to explicitly include College Transition. The following proposal would add more than 10,000 to the number of Mainers with college degrees over the next 10 years.

The College Transition plan will develop a system of consistent, high quality advising and preparation for adults seeking to enter the Community College or University System at 30 locations in Maine. The 30 programs will be located strategically throughout the state and extend their reach even further through use of the MDOE's ATM system, already being piloted for high school diploma classes. The 6 pilot programs funded by the State of Maine in 2006 currently in operation, plus 7 programs funded by the Nellie Mae Education Foundation and 1 funded by the Betterment Fund, plus the 11 MELMAC Education Foundation grants which reach 25 adult education locations have developed an effective menu of services and, if expanded to the 30 permanent programs, could meet this goal of increasing the number of Maine people prepared to succeed in earning degrees.

Expand Adult Education Capacity: 30 College Transition sites

An impressive 81% of college transition students in 2003, recently surveyed, reported matriculating without needing to take developmental courses on campus. The persistence rate after one year was an equally impressive 71%. Results from the Nellie Mae program evaluations are similarly positive, as are the preliminary results from the 2006-2007 pilots.

BOTTOM LINE: Maine adults can achieve success in college with a boost from adult education and the State of Maine.

The College Transition Proposal

The operation of 30 Adult Education College Transition programs would cost \$1 million per year, plus the cost of program administration by the Maine Department of Education. The budget proposed by Governor Baldacci would fund the immediate expansion to the 30 sites building on the strong foundation created by the Nellie Mae, MELMAC, and Betterment Foundations and the state-funded pilots, as well as the efforts by local adult education programs. Maine Adult Education is ready for the task.

At the end of 10 years, assuming a very conservative 55% college enrollment and persistence rate, the Compact's goal of 10,000 new degrees from the adult population would be surpassed.

February 16, 2007

Maine Department of Education Initial Status Report College Transition Program Demonstration Sites

This report provides a snapshot of the six College Transition Demonstration Sites funded by the passage in 2006 of LD 1785. The pilot sites have been in operation for four to six months, have hired or reassigned staff to the College Transition activity and enrollment has been immediate and productive. Memoranda of Understanding have been signed with all seven Community College campuses and all sites are working collaboratively with regional campuses of the Community College and/ or the University of Maine System. The initial expectation for participation was an average of 80 enrollments per program or 280 for the first semester. Current total enrollment (7/1/06-1/15/07) is 378 adult students, so we have substantially exceeded our expectations. 70% of these learners are under the age of 50 and more than half of them have never previously enrolled in a college or university course.

A seventh site, Machias, is funded by a grant from the Betterment Fund, and is operating under the same parameters as the six State funded sites.

Location	Start-Up Activity	Post-Secondary Collaboration	Enrollments	% of Enrollees with a HS Diploma	% of students who are new to College Transition
Bangor	Hired Transition Counselor, began classes in basic math, algebra, and writing. Developed the "CAFE" (College Access for Everyone) program identity.	Eastern Maine Community College, campus classroom space, Accuplacer Testing, referrals	126	53%	73%
Bridgton	Hired Transition Counselor, began classes in developmental math, writing, and chemistry. "College Connection" identity.	Southern Maine Community College, Accuplacer testing on-site at learning center.	29	79%	79%
Capital Area: Augusta, Gardiner, Hall Dale, Maranacook, SAD132/133	Hired 6 coaches and a program coordinator, using existing college preparation math and writing classes, initiating college coaching and awareness programs.	Collaborative agreements with University of Maine Augusta and Kennebec Valley Community College, Accuplacer testing on-site, classes located at UMA campus.	87	54%	57%

Fairfield	Developed "KV Academy" identity, hired a project coordinator, expanded instructional time for developmental courses	Classes located at space provided by Kennebec Valley Community College, Accuplacer testing and referral by KVCC staff.	37	100%	100%
Sanford	Utilized existing staff with expanded hours. Developed "ROAD" program identity (Removing ObstaclesAchieving Dreams)	Accuplacer testing on-site, collaborative efforts with Southern Maine Community College and Sanford-Saco campus centers of USM.	75	50%	42%
South Paris	Utilized existing staff with expanded hours. Developed "ACT" (Adult College Transition) program identity. Using cohort model and "Road Map to College" course work.	Collaborative efforts with Western Maine University College Center and SMCC.	16	100%	87%
Machias * Betterment Grant for Rural Area	Utilized existing staff with expanded hours and responsibilities, the program established "TRAILS" as program identity. New program starting at WCCC in February.	Collaborative efforts with University of Maine Machias (classroom space) and program class placement at Washington County Community College.	8	87%	87%

The column labeled "% of enrollees with a high school diploma" indicates the % of enrollees who entered the College Transition program with a high school diploma or GED. The remaining % of enrollees is participating in the College Transition program while earning their high school diploma or GED through the adult education program.

The final column "% of students who are new to College Transition" indicates the percentage of learners entering the program that have returned to adult education or never previously participated in adult education or College Transition programming."

An independent evaluation of the project, paid through grant funds from the Lumina and Nellie Mae Education Foundation, will take place during 2007.

Executive Summary

Maine Adult Education consists of 118 publicly funded adult education programs with 115,462 enrollments by adult learners throughout our state. Local communities have strongly supported the Adult Education System for many reasons including:

- Educational Attainment
- Economic Development
- Community Development
- Human Development

For more than forty years, the partnership between local taxpayers and state and federal governments has provided a strong, accessible, and efficient system that offers a continuum of educational services responsive to local conditions.

MAINE ADULT EDUCATION ANNUAL REPORT

118 programs 115,462 enrollments

July 1, 2004 - June 30, 2005

Educational Attainment

3,108 high school credentials were awarded 11,806 enrollments in Literacy classes 2,558 enrollments in College Transition courses

In the 2004-2005 school year, there were more than 15,000 enrollments by Maine adults in high school completion courses offered through Maine Adult Education programs. Many of these individuals left traditional high school programs for family

or economic reasons.

The majority of adults who earned their high school credential last year stated they wished to enter college. Through College Transition programs, Maine Adult Education also helps another segment of our population enter and succeed in college. These individuals hold high school credentials, but do not have the skills or prerequisites necessary to succeed at our local community colleges or universities.

Only 37 percent of Maine residents 25 and older hold a higher education degree compared with 46 percent in the New England region. The Maine Compact for Higher Education has set a goal for Maine to have 40,000 more

college graduates in the next decade. Since the number of youth will continue to decline, the increase in college matriculation must be met by currently employed adults. This is an area of growth for Adult Education and one of four strategies identified by the Compact.

"Adult education programs are natural stepping-stones to higher education."

Greater Expectations, Maine Compact for Higher Education, May 2004

continued on back...

"Our workforce isn't yet ready for tomorrow's jobs. Compounding the challenge are thousands of older, less-educated workers laid off by downsizing companies. All of that points to an enormous challenge of retraining and re-educating ourselves for the new economy."

Charting Maine's Future,

Charting Maine's Future,
The Brookings Institute, 2006

"More workers must demonstrate higher levels of literacy, technology proficiency, and self management to function successfully in the workplace."

Trends and Implications for the

Maine Workforce,

Maine Dept. of Labor, 2005

Economic Development

22,174 enrollments by Maine adults in vocational courses

2,558 enrollments by Maine adults in college transition courses

Vocational education strengthens people and communities. It gives people the resources and skills they need to cope with change. Skill areas include computer technology, hard trades, allied health, and retail sales.

During the past five years, Maine Adult Education has served many of Maine's dislocated workers from more than 100 companies including small companies from all corners of the state to large mills in Dexter, Millinocket and Biddeford. The workers successfully learned new skills to reenter the job market or proceed to post-secondary training.

Community Development

63,372 enrollments in personal enrichment classes

Lifelong learning is one of the primary goals of our public education system. Such learning strengthens the bonds between community members. The activities are as varied as our learners, ranging from foreign language learning to aerobic exercise, or wreath-making. These courses are housed in our public schools but all instructional and material costs are borne by the learners.

Human Development 2,110 individuals received ESOL instruction (English for Speakers of Other Languages) 18 Local programs enrolled 277 families in family literacy

Many of our citizens do not possess the necessary skills to function in our literate community. These skills include basic reading comprehension and numeracy skills. Many of these learners are immigrants who desperately need these skills in order to become more functioning members of our communities.

Family Literacy is another program supported by our adult education funds. These programs focus on increasing the skills of both the parents and the child since the strongest indicator of how a child will achieve and succeed in education, is the educational goals and attainment of his or her parents.

Adult Education Funding

Funding for Adult Education is substantial and diverse. The foundation for all these sources is the "local share." Local share is the money local communities raise for adult education. This supports the infrastructure from which to address the local educational needs. The adult education state subsidy is used to pay for academic and vocational instructional costs and program administration. No state funding is used for personal enrichment instruction.

SOURCES	FY 2004	FY 2005
State Funding	\$ 4,651,482	\$ 4,669,971
Local Share	7,827,356	8,156,335

Maine Adult Education Association P.O. Box 187 Greenwood, Maine 04255 207.875.2722 or 357-7510 maea@megalink.net

Senator Rotundo, Rep. Fischer, and members of the Appropriations Committee, and Senator Bowman, Representative Norton and members of the Education Committee,

I am Cathy Newell, currently Executive Director of the Maine Adult Education
Association and former adult education director in Bethel. The Maine Adult Education
Association enthusiastically supports the acceleration of the College Transition program included in the budget.

I would like to present you with background material on Adult Education College
Transition as well as information from several of the state-funded pilots and Nellie Maefunded programs, including Bangor, Rockland, Caribou, Sanford and Fairfield. There are
some very compelling student stories included, as well as program data and descriptions.

For those of you who were in these seats last year, the report of the pilot sites, and its accompanying map, will be especially heartening as you provided the initial funding for this project. Our 7 programs exceeded their first semester goal of 280 students by nearly 100. This, along with earlier data from the Nellie Mae and MELMAC funded sites, shows that Maine adults are ready to further their education when given a chance.

Maine must have a more highly educated workforce and 80% of the workforce of 2020 is on the job today. The boost provided by our programs can make all the difference in the success of adults in college programs as you will hear in later testimony.

We are looking forward to working with the Maine Department of Education, the Compact, MELMAC, and our post-secondary partners to implement the 30 site program and get going on achieving the goal of increasing the number of degree-holders in Maine.

Joint Standing Committee On Appropriations and Financial Affairs

Testimony of Henry Bourgeois Concerning LD 499 -- the budget request for the College Transitions Program

Senator Rotundo, Representative Fischer, Senator Bowman, Representative Norton and members of the Joint Standing Committee on Appropriations and Financial Affairs, and the Joint Standing Committee on Education and Cultural Affairs.

My name is Henry Bourgeois. I am executive director of the Maine Compact for Higher Education. I am here to testify in support of the budget request for the College Transitions program.

The Compact is a group of business, education, government and community leaders who have been working together for three years to promote the importance of higher education as an economic imperative for Maine's future. We believe that Maine's long-term economic growth requires a highly educated workforce. To compete in the 21st century economy, Maine's workforce must be among the best educated in America. Our goal is to increase the percentage of Maine's workers who have earned an associate's, bachelors or graduate degree to the New England average.

This will require 40,000 new degree holders above projections by 2020–10,000 of whom will receive support from the College Transitions program.

With Maine's demographic challenges – aging population, drop in number of high school-aged students, 80% of incumbent workers will be working in 10 years – a major focus of our effort must be on ways to help more adults earn degrees. The College Transition program is one of the Compact's five action strategies. It will help adults transition to college – especially adults who are earning a high school diploma or who have a diploma but are under-prepared academically.

The College Transitions program is delivered by local adult education centers in partnership with Maine's Community Colleges, Universities and private colleges.

We know this can work, because seven adult education programs have successfully piloted this approach the last five years with foundation support, the MELMAC Education Foundation has invested in twelve more sites, and the Legislature supported six pilot sites last year. College Transitions is so effective that the Lumina Foundation gave us a grant to prepare assessment protocols, curriculum, and articulation agreements to expedite implementation statewide.

Maine's adult education centers are in an ideal position to help 10,000 adults earn college degrees: they currently help about 3,000 adults earn high school degrees, but only about 500 go on to college. Over 100,000 adults participate in adult education programs.

This budget request builds on our positive experiences by supporting thirty College Transition sites across the state to serve all our adults through regional networks. I urge your support of this innovative, cost-effective approach. Thank you for your time. I would be glad to answer your questions.

dusiness & Education at Work for Maine

March 6, 2007

Hon. Margaret Rotundo, Senate Chair

Hon. Jeremy R. Fischer, House Chair

Joint Standing Committee on Appropriations and Financial Affairs

Hon. Lynn Bromley, Senate Chair

Hon. Nancy Smith, House Chair

Joint Standing Committee on Business, Research, and Economic Development

Dear Senators Rotundo and Bromley, Representatives Fischer and Smith, and Distinguished Members of the Joint Standing Committees on Appropriations and Financial Affairs and Business, Research, and Economic Development:

Enclosed please find for the work sessions on L.D. 499 responses by the Finance Authority of Maine to requests made by Committee members at the public hearing held February 27, 2007.

As you will recall, the information requested of FAME included:

- 1. With respect to FAME's business development and natural resources marketing programs, what amount of money would be useful to assist "gazelle-like" businesses (verbal response to be provided at work session);
- 2. Regarding the Area Health Education Centers (AHECs), a description of the recruitment activity and principal partners in the program (see Appendix A, attached memo from Holly Korda);
- 3. Racino money: whether any of it goes to FAME-sponsored Fund for Healthy Maine programs (Dental Education, Health Education Centers, Quality Child Care) (see answer below); and
- 4. Quality Child Care Centers: a list of the geographic distribution of the program's beneficiaries (see Appendix B, attached list).

With respect to racino money, pursuant to 8 M.R.S.A. § 1036(2)(E), 10% of racino money is forwarded to the Fund for a Healthy Maine. According to the Bureau of Budget, some agencies receive a portion of this money directly (not FAME), but much of it is commingled with other FFHM money and distributed among various agencies for the purposes set forth at 22 M.R.S.A. § 1511(6). As such, FAME does not directly receive a share of the racino money, although it does benefit indirectly when, as now, there are increased revenues in the available pool of FFHM money.

We hope you find this information useful. We look forward to attending the work sessions and to responding to any additional questions Committee members may have.

Sincerely,

John C. Witherspoon Ein

Chief Executive Officer

Encl.

Maine AHEC Network: Pipeline Through Practice Programs to Develop Maine's Health Workforce in Primary Care

To: Members of the Joint Standing Committees on Appropriations and Financial

Affairs and Business, Research and Economic Development

From: Holly Korda, M.A., Ph.D., Maine AHEC Network Director and Associate Dean for

Community Programs, University of New England College of Osteopathic

Medicine (UNECOM)

Re: Maine AHEC Network Activities and Community Outreach

Date: March 2, 2007

This memorandum provides background on the Maine AHEC (Area Health Education Centers) Network for consideration in your FY08-09 budget deliberations. I regret that I arrived late from Biddeford and missed the opportunity to provide this information directly at the February 27 public hearing in Augusta, but am fortunate to have been briefed by my colleagues, Bill Norbert and John Witherspoon of the Finance Authority of Maine (FAME), who provided you some background on AHEC's activities at the meeting.

Maine's AHEC Network, established in 1985 by the University of New England College of Osteopathic Medicine (UNECOM), is one of 49 state AHEC programs funded by the Health Resources and Services Administration (HRSA) with the mission "to improve the distribution, diversity, supply and quality of healthcare personnel in the health care services delivery system in rural and underserved areas." The Network works through partnerships with FAME, Maine's Office of Rural Health and Primary Care, and others, and with guidance from its statewide Advisory Committee (see roster attached).

The Maine AHEC Network includes a Program Office and 3 Centers:

- AHEC Program Office, located in the Division of Community Programs at UNECOM's Biddeford campus, coordinates activities of the State network and programs for school children, medical and health professions students, and primary care practitioners in rural and underserved areas across Maine. The Program Office supports a Center for Health Literacy; administers an Oral Health Initiative with Maine's Offices of Rural Health and Oral Health; houses community education and provider training materials of Maine's Geriatric Education Center; and led the development of an online MPH Program at UNECOM that primarily targets professionals working in Maine.
- Acadia Health Education Coalition AHEC, located in Bangor, supports preceptors
 and health professions rotations in rural areas (including arranging housing) for 120
 UNECOM medical students and physician assistants, U-Maine nurses, and others;
 runs programs that introduce "kids into health careers" across the State, including
 leading development of a web portal for health professions training, scholarship and
 mentoring (launch date: May 8), and providing programs for school-aged children in
 grades kindergarten through 12 that introduce them to health careers and
 opportunities; and engages in outreach to expand the primary health care workforce.
- Franklin Community Health Network (FCHN) AHEC, located in Farmington, provides enhanced continuing education and training in rural health and hospital care, including on-site seminars and symposia for rural providers, distance education

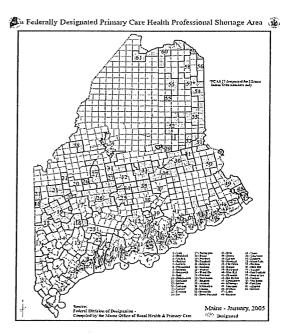

opportunities, and a nursing degree program developed in collaboration with Central Maine Medical Center in Lewiston; and engages in outreach for web portal activities (above) in the Franklin County region.

Maine Center for Public Health (MCPH) AHEC, located in Augusta, provides
expertise in public health information and assessment, as well as resources for
training Maine's public health professionals and for public health training of other
clinicians. MCPH oversees population health projects for more than 120 UNECOM
students each year, coordinates internship opportunities for students from Maine
universities in public health positions statewide, and supports web portal activities
(above) in the Augusta area.

Need and Funding. Maine continues to face chronic shortages of primary care practitioners—a problem exacerbated by the demographics of the State's current workforce. Recent analyses by the Maine Department of Labor show that the State faces serious health workforce shortages in areas outside its urban centers as practitioners "age out" and retire. Maine's only medical school, UNECOM, currently produces more than 100 physicians, a majority of whom practice primary care, but these numbers are not sufficient to meet need as current practitioners enter retirement. Nearly 10% of all Registered Nurses over the age of 52 (545 total) expect to leave nursing within five years—with only 610 total graduates of Maine Nursing Programs, including many who leave the state following graduation, during the 2004- 2005 academic year. Over half of all Licensed Practical or Vocational Nurses in Maine are between the ages of 52 and 71. Nursing Aides, Orderlies, and Attendants have also experienced persistent vacancies, with an estimated 1,038 reported in 2005.

Maine also has the fourth highest chronic disease death rate in the nation, with three of four deaths attributed to cardiovascular disease, cancer, chronic lung disease, and diabetes. The State's population is aging rapidly and by 2010 the U.S. Census Bureau predicts that 15.6% of Maine residents will be aged 65 and older, ranking Maine third "oldest" among all states. These conditions create significant demand for healthcare professionals and services, and impose especially difficult circumstances for Maine's rural and underserved communities.

The Maine AHEC Network helps to support the State's health manpower training needs using its pipeline through practice program strategies. The Network service area covers 64 Health Professional Shortage Areas that include 36 Community Health Centers and 49 Rural Health Clinics that may benefit from the AHEC Network, which offered continuing education that reached 6,221 Maine health professionals with over 34,213 contact hours in 2006. Key Network goals for the coming grant cycle are to build on this success using distance education, on-site rotations and training, integrated value-added models of primary care delivery, and partnerships with the public and private sectors—to focus on performance and results across the spectrum of primary care providers, and address these critical health manpower gaps statewide.

In most states, AHEC operates under the umbrella of the state's publicly supported medical school, and receives state appropriations to help expand and leverage limited HRSA funding and matching requirements of medical school sponsors and center recipients. According to a 2004 survey, state AHEC appropriations from 35 responding states ranged from \$0 to \$43.8 million, with an average appropriation of \$2.58 million, accounting for 45 percent of the state's AHEC budget. Maine is one of a handful of states where AHEC operates through a private medical school, and has been extremely effective leveraging limited resources. Last year, Maine's AHEC Network received just \$166,000 from the State of Maine (all sources), in addition to \$255,000 in federal funding. This funding was supplemented by \$200,000 in match from UNECOM, an additional \$156,553 combined match from the Centers at Bangor, Farmington and Augusta, and just over \$150,000 from private and other sources.

Community Partners, Outreach, and Activities, FY2004-2007. Highlights of Maine AHEC Network's activities include:

- Rural health rotations: 223 Osteopathic Medical students, 36 nursing students, 73 physician assistants, 58 public health professionals (via UNE), 15 allied health workers, 2 others.
- On site AHEC Preceptors: 169 Medical preceptors, 1 advanced practice nurse, 17 physician assistants.
- Continuing education training: 622 physicians, 1188 nurses, 364 advanced practice nurses, 149 physician assistants, 1 pharmacist, 21 dentists, 378 mental health professionals, 63 physical therapists, 346 public health professionals, 281 community health workers, 1430 allied health workers, 278 other health professionals.
- Recruitment into health careers: 4369 students in grades K-8 (<20 hours), 1759 students in grades 9-12 (<20 hours), 441 students who completed health careers training programs (>20 hours, Survivor Aroostook, etc.)

Activities Planned and Proposed, FY2008-2010. The Maine AHEC Network recently submitted its plan for the upcoming 3-year period. The Network will continue its health workforce development activities described above, and will enhance its data collection and reporting statewide. Additionally, the Maine AHEC Network seeks additional funding to:

- 1. Permit the Acadia AHEC, Maine's oldest and northernmost AHEC Center, to better serve Aroostook and Washington Counties. Maine has only 3 AHEC Centers. The Acadia Coalition AHEC Center serves an enormous geographic area, including medically underserved communities in Northern and Downeast Maine. After years of level-or-declining federal and State funding, Acadia has consolidated its staff in Bangor. It maintains strong ties and relationships in Aroostook County, and additional FAME funding could be targeted to support restoration of a satellite office in Aroostook County.
- 2. A key workforce "pipeline" strategy will be launched May 8, 2007: a "Maine Health Careers" web portal to serve as a one-stop health professions site for Maine. Modeled on a successful initiative in upstate New York,

MaineHealthCareers.com will provide easy one-stop access to comprehensive information on health careers, health professions training programs, scholarships and tuition assistance, as well as links to career exploration programs and e-mentors. With initial funding from the Maine Office of Rural Health & Primary Care, the project will initially target Maine youth, each of whom receives a laptop computer for use through grades 7 and 8. With sufficient funding, the website can be adapted to also serve adults-incumbent workers and their advisors-and to provide online tools for assessment of the foundational skills required for success, as well as on-line skill gap training. For the short-term, additional funds are still needed to support sufficient outreach to assure that the project reaches its potential.

I respectfully submit this information on behalf of the Maine AHEC Network and look forward to addressing your questions in the upcoming work session to determine appropriations to support the Network's important work in Maine.

March 5, 2007

The Honorable Margaret Rotundo, Chair The Honorable Jeremy Fischer, Chair Joint Standing Committee on Appropriations & Financial Affairs 123rd Maine Legislature Augusta, ME 04333

Dear Senator Rotundo, Representative Fischer and Members of the Joint Standing Committee on Appropriations & Financial Affairs:

I am pleased to provide you with responses to questions that were raised during the recent public hearing to review the Maine Community College System's 2008/2009 biennial budget request. While I will be available for the Committee's work session, should you have additional questions or require clarification of the responses provided, please do not hesitate to contact me.

Sincerely yours,

ohn Fitzsimmons

Presiden

QUESTION #2

Please provide information on "administrative costs" and comparison with other community college systems nationally.

Response

According to the U.S. Department of Education IPEDS Data Feedback Report, the campuses of the Maine Community College System have, on average, significantly fewer non-faculty staff members than do our peer institutions (based on the most recent data available from Fall 2005). The average number of these staff members¹ for the Maine Community Colleges is **62**, while our peer institutions (10 New England community colleges with similar enrollment) have an average of **99**. Enrollment at Maine's community colleges has grown by more than 3,500 in four years while the number of full-time staff has remained virtually unchanged.

In addition, the MCCS System Office has 20.5 employees for a total credit headcount of 13,021 (Fall 2006). By comparison, New Hampshire's Community/Technical College System employs 50 people for a total credit headcount of 12,670.

As noted during the February 15 public hearing, the recent Brookings Institution report states that "Maine has the nation's *highest ratio* of 'other' payroll to instructional payroll, with \$2.13 going to non-instructional payroll for every \$1 going to instruction payroll."

Includes all executive, administrative, managerial staff, other professional FTE staff, and non-professional FTE staff.

These numbers do not paint an accurate picture of the Maine Community College System's non-instructional payroll. The data included in the Brookings Institution report combines the Maine Community College System and University of Maine System and is taken from the 2002 U.S. Census. Although this data is the most recent available from the census, it predates the transition of the MCCS from technical to community colleges in 2003 and does not capture some of the non-instructional savings realized from that transition. A review of MCCS FY06 audited financial statements shows that the MCCS actually spent \$0.64 in non-instructional payroll costs for every \$1.00 of instructional payroll costs.

QUESTION #3

Please provide detailed information on "revenue vs. expenditures" including all sources of revenue and all major expenditure lines.

Response

Maine Community College System

FY2006 All Funds

REVENUES	2006
Students	26,486,541
Appropriation	43,218,462
Government Grants & Contracts	20,366,169
Private Gifts, Grants & Contracts	4,351,837
Investments	1,541,503
Sales and Services	10,305,215
Other Revenue	1,446,609
Non-Revenue Receipts	15,319,914
Total Revenues	123,036,250
EXPENDITURES	
Personal Services	63,139,060
Total Personal Services	63,139,060

Total Capital	16,128,284
Total Expenditures	119,250,562
NET CHANGE *	3,785,688

- * The excess of revenue over expenses is primarily a result of three factors:
 - The timing of receipts on Federally restricted funding that is in excess of expenditure
 - Gifts and investment income from endowments directed toward scholarships
 - Receipts on capital projects funded with public bond issues

QUESTION #4

Please provide information on "tuition waiver" programs. Who qualifies, annual dollars waived, qualification guidelines, number of participants, etc.

Response

A waiver is defined as the reduction in whole or in part of fees or costs that a college would otherwise collect. There is no offsetting payment from another source, so the college loses an amount that would otherwise be receivable.

For the 2005-2006 academic year the total cost of waivers was over \$1.1M. Some waivers are statutorily required; some have been authorized by the MCCS Board of Trustees; some are contained in the collective bargaining agreements with MCCS employees. The following are examples with approximate financial impact based on FY06 data. The number of participants in each waiver category was not available.

- New England Board of Higher Education Tuition Break ("Apple") Program provides a discount on tuition to New England residents when they enroll in approved degree programs at out-of-state public colleges and universities throughout New England. Students who meet admissions requirements and enroll in qualified degree programs pay 150% of in-state tuition instead of out-of-state tuition. Approximate financial impact: \$12,000
- Aspirations Program provides high school students with the opportunity to take courses in which space is available tuition free, with MDOE paying half the tuition and the college paying half. High school seniors taking MCCS courses must have a 3.0 or B average, be approved by their parents and school, enroll in general education courses, and pay for fees and books.

 Approximate financial impact: \$70,000 (MCCS portion)

(Note: funding from the state increased significantly for the 06-07 academic year and the financial impact for this year is not yet available.)

- *Foster Children* who are in the custody of DHS and reside in foster care at the time of high school graduation, are Maine residents, meet admissions requirements and remain in good academic standing qualify for up to five years of full-time enrollment. *Approximate financial impact:* \$32,000
- Dependents and Spouses of Certain Veterans: the legal children, step-children and spouses of veterans totally and permanently disabled by, or who died as a result of veteran's service may qualify. Children must be at least 16, have graduated from high school, be enrolled in a degree program before turning age 22 and applied before turning 25. Those applying for the waiver as of 1/1/06 must show the veteran entered the service from or resided in Maine for five years immediately preceding beneficiary's application for benefits. Child's waiver may be reduced by amounts of other benefits received.

Approximate financial impact: \$277,000

- Native Americans who are included in the current Penobscot or Passamaquoddy tribal census, or the child or grandchild of a Native American tribal member or of a Maliseet or Micmac band number holder who has been a resident of Maine for one year may receive benefits based on academic and tribal eligibility.

 Approximate financial impact: \$336,000
- Resident Assistants in college dormitories receive tuition and room and/or board waivers in return for their work with students in college resident halls. Each college has established criteria the student must meet to qualify for these positions.

 Approximate financial impact: \$250,000
- The various Bargaining Units within the MCCS have tuition waiver benefits for the employee, spouse and dependent children. Requirements may vary by collective bargaining agreement, most allowing participation when space is available in courses, with all agreements allowing no more than two years of full-time course work. Approximate financial impact: \$110,000

QUESTION # 5

How many campuses offer "developmental" courses, which campuses, what percent of students need to take them, how many students need to take more than one, in what area is the need highest, etc.?

Response

All seven community colleges offer developmental courses in math and English, in reading and/or writing. The most frequently needed developmental courses at all of the colleges are in math, which is true nationally. In fact, the most recent data from the National Center for Education Statistics' finds that 42 percent of the total number of first-time freshmen who

² NCES, 2004: Remedial Education at Degree-Granting Post-secondary Institutions in Fall 2000.

were enrolled in public, 2-year institutions, enrolled in remedial courses in Fall 2000. Of the total number of students enrolled in these colleges, 35 percent took developmental math courses, 23 percent took developmental writing, and 20 percent took developmental reading. (The percentages related to the developmental courses equal more than 42 percent, because some students took more than one developmental course.)

For MCCS, the percentage of first-time college freshmen who enrolled in developmental courses in Fall 2006 was 47.8 percent or 1,507 students. Of that number, 561 or 37.2 percent enrolled in more than one course.

Maine Community College System	Number	Percent
		of
		Cohort
First-year/First-time Matriculated Freshmen – Fall 2006 Cohort *	3,153	
Total <i>Unduplicated</i> Matriculated Headcount enrolled in developmental	1,507	47.80%
courses (less than 100 level)	Ì	
Total Enrollment in Math Courses	1317	41.77%
Total Enrollment in Reading Courses	374	11.86%
Total Enrollment in Writing Courses	377	11.96%

^{*} First-time/First-year Matriculated Freshmen only. Does not include transfer students or students with prior college experience. This is a common definition that is accepted nationally and allows us to give comparison of MCCS to other community colleges.

Math is by far the greatest need both nationally and within MCCS. Although the national and MCCS data cited here is for two different points in time, it appears that MCCS students need significantly less remedial assistance in reading and writing than do their peers across the country.

Additionally, a question was raised regarding enrollment in community college developmental/remedial education courses being used as a revenue generator for the colleges. Below is the cost model used by Central Maine Community College for developmental course delivery during the spring 2007 semester.

Average number of students in courses: 12 Per student cost for a 3 credit course @ \$78.00 per credit hour Revenue produced (average per course @ \$234 x 12 students)	\$ 234.00 \$2,808.00
Instructional Cost of Course Scenario 1: Course taught by adjunct faculty Gain of \$44.55	\$2,763.45
Scenario 2: Course taught by full-time faculty	\$3 173 31

Revenue Produced from Developmental/Remedial Courses

Loss of \$365.31

QUESTION #6

Please provide the amount requested by the MCCS of the Governor for its FY08 and FY09 budgets and verify that it is the amount submitted in the Governor's budget.

Response

Yes. The percentage increase requested by the MCCS Board of Trustees in each year of the FY08/FY09 biennium is the percentage increase included in the Governor's Budget Package. That percentage increase is 6 percent in each year of the biennium.

FY08 \$2,796,517

<u>FY09</u> \$5,728,425*

QUESTION #7

Please provide personal services, all other and capital expenditure detail for FY05 and FY06.

Response

QUESTION#8

What does the \$500,000 FY07 appropriation to Early College for ME pay for? How does the Racino money relate to the \$500,000 and the Osher Grant?

Response

The FY07 \$500,000 appropriation funds the Personal Services and All Other costs for the seven (7) full-time and four (4) part-time staff located at the community colleges who serve local schools and students.

Overview of Early College for ME

ECforME is a college-transition program that begins in the junior year of high school and continues into community college. ECforME is now offered in 74 high schools around the state. ECforME is designed for students who are undecided about college, yet have the potential to succeed in college. Students are selected for the program by their high school. ECforME expects to serve up to 1,400 students in FY07. The following schools participate in the program this year:

Bangor High School	Katahdin High School	Portland West
Biddeford High School	Kennebunk High School	Presque Isle High School
Bonny Eagle High School	Lawrence High School	Richmond High School
Boothbay Regional High School	Lewiston High School	Sacopee Valley High School
Brewer High School	Lewiston Regional Technical Center	St. John Valley Tech. Center
Buckfield Jr./Sr. High School	Liberty School	Sanford High School
Bucksport High School	Lisbon High School	Scarborough High School
Calais High School	Marshwood High School	Shead High School
Capital Area Technical Center	Massabesic High School	Skowhegan Area High School
Caribou High School	Mattanawcook Academy	South Portland High School
Central Aroostook Jr./Sr. High School	Messalonkee High School	Telstar High School
Cony High School	Mid-Coast School of Technology	Thornton Academy
Edward Little High School	Mt. Abram Regional High School	Traip Academy
Ellsworth High School	Mt. Ararat High School	United Technologies Center
Falmouth High School	Mount Blue High School	Washington Academy
Forest Hills High School	Mount View High School	Waterville High School
Fort Fairfield Middle/High School	Narraguagus High School	Wells High School
Foxcroft Academy	Noble High School	Westbrook High School

Freeport High School	Nokomis High School	Windham High School
Gorham High School	Old Town High School	Winslow High School
Greely High School	Orono High School	Winthrop High School
Hampden Academy	Oxford Hills Comp. High School	Wiscasset High School
Hodgdon High School	Piscataquis Comm. High School	Woodland Jr./Sr. High School
Houlton High School	Poland Regional High School	York High School
Jay High School	Portland High School	

The Racino funds were designated by the Governor as the match for the \$1million grant ECforME received from The Bernard Osher Foundation to assist MCCS in providing scholarships to participating students.

QUESTION #9

Please provide a description of the MCCS retirement plans for employees, their options, what the System pays for, etc.

Response

MCCS employees are required to choose between two retirement options: the Maine State Retirement System (MSRS) or the Teachers Insurance & Annuity Association College Retirement Equities Fund (TIAA-CREF), in lieu of social security. The retirement options and employer costs are outlined in the tables below.

MCCS RETIREMENT OPT	IONS		
	MSRS		
	State Employee/Defined TIAA-CREF		
	Benefit Plan	Defined Contribution Plan

QUESTION #10

The Brookings Report indicates that \$2.13 of non-instructional payroll costs are spent in higher education in Maine compared to \$1.00 in instructional payroll costs. How does that relate to the MCCS?

Response

The recent Brookings Institution report states that "Maine has the nation's *highest ratio* of 'other' payroll to instructional payroll, with \$2.13 going to non-instructional payroll for every \$1 going to instruction payroll."

These numbers do not paint an accurate picture of the Maine Community College System's non-instructional payroll. The data included in the Brookings Institution report combines the Maine Community College System and University of Maine System and is taken from the 2002 U.S. Census. Although this data is the most recent available from the census, it predates the transition of the MCCS from technical to community colleges in 2003. A review of MCCS FY06 audited financial statements shows that the MCCS actually spent \$0.64 in non-instructional payroll costs for every \$1.00 of instructional payroll costs.

Testimony to the Joint Standing Appropriations and Financial Affairs Committee and the Education and Cultural Affairs Committee Work Session on March 7, 2007

Maine Educational Center for the Deaf and Hard of Hearing and Governor Baxter School for the Deaf Budget

FY '08- \$6,567,800 & '09- \$6,611,228

Good morning Chairpersons of the Joint Standing Education and Cultural Affairs Committee, Senator Peter Bowman and Representative Jacqueline Norton and the members of the committee. I am glad to have the opportunity to meet with all of you again at this work session. After the presentation I made in support of the Department of Education's Commissioner Susan Gendron, it became clear to me that it would be necessary for me to prepare a presentation that would accomplish 2 things. One, clarify to all legislators that the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf functions as a Quasi-Independent State Agency. Two, that in accordance with Maine Education and School Statues under M.R.S.A. 20-A, Chapter 304 Section 7406 (4-A) that I, as the administrative agent for the School Board am mandated to present a budget to the Governor and the Legislature for review by the joint standing committee that has jurisdiction over education matters.

Clarification and History of the Existing Governance Structure

I will first clarify the history of the present arrangement that requires the superintendent of this entity, the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf directly report budgets and submit annual reports to the Governor. This was the outcome of a legislative task force that took place in 1999-2000 and this task force ascertained that the past arrangement of governance and development of budgets between the Maine Educational Center for the Deaf and Hard of hearing and the Governor Baxter School for the Deaf and the Department of Education (DOE) was, based on past performance, not in the best interests of the educational community and the children who are deaf or hard of hearing. I respectfully want to point out that this was a cumbersome arrangement that required the DOE to do both, supervise the school's superintendent and serve as education policy regulators. Supervising the organization from afar caused some problems in past years and was corrected by empowering a local school board to work closely with the superintendent in governing all aspects of school operations through the board and its sub-committees. Allow me to characterize the past and present relationships between the governing bodies and the

school superintendent. Prior to the present governing structure, the superintendent reported directly to a representative from the department of education, minimizing the democratic process of involving concerned stakeholders including parents, teachers and students from access to a governing body to present concerns pertaining to the school community as needed. This kind of governing structure is what I define as a stateoperated school. With a state-operated school, matters of supervision and final decisions rested with the superintendent and the DOE provided budget supported by state funds. We now have a vastly different structure of governance. What we have today is what is defined as a state-supported school. As such, funding is provided by the state and governance rests with a local school board recommended by the governor and confirmed by the Joint Standing Education and Cultural Affairs Committee. This structure makes for a much more accessible due process system and allows stakeholders to address concerns at different levels of management to arrive at solutions in accordance with school board policies. The role of the Department of Education under this arrangement is solely that of policy regulation not supervision. We, at the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf, are mandated to ensure compliance required by federal and state education law; special education law and policies. In terms of the budgetary process, we are also mandated to present a proposed biennium budget to the Governor. The Governor's Office has relied the Department of Administrative and Financial Services, as with all state agencies, to consider our budget as it goes about formulating the state's comprehensive budget. We, in turn, are to make this budget proposal known to the Joint Standing Education and Cultural Affairs Committee for its approval and vote. Administratively, as far as governmental process was concerned, it has been a very effective process. The Department of the Administrative and Financial Services' Commissioner Rebecca Whyke, however, feels that The Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf would be better served if the state moves our budget under the education portion of the budget. In this way, it would assure us of the same protection public schools enjoy when the state considers the implementation of cost cutting measures among its many state agencies to achieve cost effective government.

The school board and I, have no reservations about the shift of the budget dollars from under the aegis of the DAFS to the DOE. This can work provided that we continue with our mission as a statewide educational agency and provide the broad continuum of services needed to best serve children who are deaf and hard of hearing statewide as a quasi-independent state agency governed by a public school board. This arrangement has enabled us to function as an independent public school entity and effectively desegregates bureaucratic responsibilities of the Department of Education, as regulators of educational policy, and the Department of Financial and Administrative Services which functions, in this case, as a local government entity providing financial support to MECDHH/GBSD since we do not generate local tax revenue. I recommend that we continue to start the budgetary process with the Office of the Governor and DAFS and as previously stated, it is fine with the school board if the DAFS wishes to allot that money to the DOE budget provided that everything else stays the same. Additionally, this desegregation of roles, in terms of past history is important for another reason. Under the old state-operated

structure that existed between the school superintendent and the DOE, too much power was vested in the school superintendent and the DOE had no mechanism to check on how the school's operational, educational and safety issues were handled. DOE representatives basically relied on reports from the superintendent alone and this caused child safety issues to occur prior to 1982 and led to the \$20 million dollar compensation plan to address past wrongs between former students and the State of Maine. However, if reservation should exist in the state legislature about this matter, I want to be sure that the joint standing education and cultural affairs committee allows representatives from the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf to participate in further discussion of this matter if it is deemed warranted.

One of the legislators asked me last week if we assume all security costs on Mackworth Island. The answer is yes, we have security guards on our payroll that keep Mackworth Island safe and serve as the first point of contact for all visitors to the island either to walk the nature trail on the island's perimeter or on school business.

Presentation of the Biennium Budget for FY '08 and FY '09

Peter Gray, Director of Business Operations, and I met with DAFS Commissioner Rebecca Whyke, Ryan Low the State Director of the Budget, David LaChance, our budget analyst and the rest of her staff in Augusta last October to review our Part I budget. We presented a very simple budget that would effectively address both present level programming and services and factored in long-range plans based on input from my administrators. The Part I budget will enable the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf to maintain its present level of services. Unlike past years, we have not formulated a Part II budget for the state's consideration. All this budget asks for is continued funding for current level of services and it only factors in increases for inflationary human resource factors such as cost of living adjustments, health insurance increases. It also contains adjustments to address increased costs for utilities that have impacted our operational budget.

All past Part II requests since I started my tenure as the Superintendent of the Maine Educational Center for the Deaf and Hard of Hearing and the Governor Baxter School for the Deaf were never granted by the legislature. That being the case, I, with the support of the school board and the state legislature began to enter into rental agreements with other educational programs to generate new revenue. This revenue will serve as the impetus for expansion of statewide educational services that the state was unable to grant us over the past 5 years. At this time, our calculations show that these rental agreements will result in an additional \$125,000 in income over the next two fiscal years. We plan to continue with the re-allocation of building space to this effect to expand statewide outreach services using our rental income pursuant to the February 2002 recommendations of the Needs Assessment Team that was submitted to and endorsed by the Joint Standing Education and Cultural Affairs Committee at that time.

This expansion will add on staff to our statewide educational services division and reduce caseloads of all of our Early Childhood Family Services Consultants and Public School Outreach Consultants. The rental revenue will serve as seed money and assist us in establishing a new fee for services arrangement with all local schools. The benefits would be two-fold, local school districts could share in costs of professional services on an as needed basis. This would be set up case by case for each child within each school administrative unit, a sliding scale of service options allowing an increased frequency of visitations depending on the student's needs. There would be 4 levels of services ranging from direct intervention from one hour a week to 6 hours a week depending on the needs of our students in public schools. We have just started to do this on a small scale and expect this to grow from our basic services model, which only allows us to visit and observe students as consultants to public school administrators and teachers at this time.

- O We will continue with the Governor Baxter School for the Deaf, which is now an early intervention (0-5) and K-8 program for deaf children with additional disabilities. The secondary or multiple disabilities vary; some have physical disabilities others have disabilities stemming from various syndromes. At this time, we have some students who manifest the following syndromes: Usher's, and Wardenberg's. In the past we have served children who have had CHARGE's syndrome. We also have students who, in addition to being deaf, are: mentally retarded, developmentally delayed and autistic. Another students have Oppositional Defiance Disorder (ODD) and Reactive Attachment Disorder (RAD).
- O Currently we have 12 students attending Portland High School. The enrollment figures vary from year to year. The students range from college bound students to ESL students. While the majority of them are deaf, we do serve students who are hard of hearing that are reliant on assistive learning devices such as FM systems.
- The cost at this time for running the PHS/GBSD program for our 12 students are as follows:

Salaries – 3 Teachers assigned to Portland High School - \$130,369 Benefits/Taxes – 3 Teachers assigned to Portland High School - \$50,192

Tuition – Portland High School based on Memorandum of understanding with MECDHH/GBSD - \$45,708*

Interpreting Costs – Portland High School - \$275,000 Total - \$501,269

*As far as I am concerned, GBSD's Deaf and hard of hearing high school students are not factored into Portland's EPS formula. This is why we pay a 50% tuition rate so our deaf and hard of children can attend Portland High School. This is just part of the memorandum of understanding we have with Portland High School to satisfy our financial arrangement of this partnership. The other part of this financial arrangement is for us to provide PHS with an American Sign Language Teacher for all Portland High School students who wish to take this course.

- o Plans to continue with a summer program known in special education circles as the Extended School Year. In the parlance of Special Education Directors, this special education provision is alluded to as ESY. Under Maine Education Law, data needs to be shown that a child has demonstrated significant regression before they qualify for additional weeks of school during the summer months. We have had parents asking us if we could extend the school year and this has been provided for deaf and hard of hearing children to ensure that they are constantly exposed to language, which is lacking in their homes. We also have another summer educational option that fosters literacy. We usually offer a weeklong literacy camp. This is partially funded by tuition fees paid by parents. We pay for the rest of the cost.
- As a statewide resource center, we utilize Maine's vast ATM technology for distance learning classes. This year we had about 90 students taking American Sign Language Classes for foreign language credit. Public Schools pay \$650.00 per student for this class and apply for special education funds and are reimbursed at a later date, approximately 2 years, by the federal government for these courses. We use the revenue to partially support the program in the form of administrative costs. We also provide ASL for Families in the evening hours through the distance learning programs, enabling families of deaf and hard of hearing children to learn sign language from the 4 corners of the state without having to make long excursions to Falmouth where we are headquartered. Our library is more than just a typical school library; we provide access to our Parent/Professional Library collection through Maine's Intrastate Library Loan System over the internet. The Parent/Professional Library collection has books on deafness, speech and language development as well as instructional videotapes on American Sign Language. It is made available to all parents and teachers working with our deaf and hard of hearing student population.

There is much more that we do, what I will do is distribute to each of you a comprehensive packet of public relations materials that we distribute to all interested parties so you can learn more about our statewide mission.

We have additional revenue that I would like to provide you with data about. If you have further questions about how these additional monies are used throughout the year, I will have Peter Gray, our Director of Business Operations to provide you with the details.

Additional funding received by MEDCHH/GBSD is as follows:

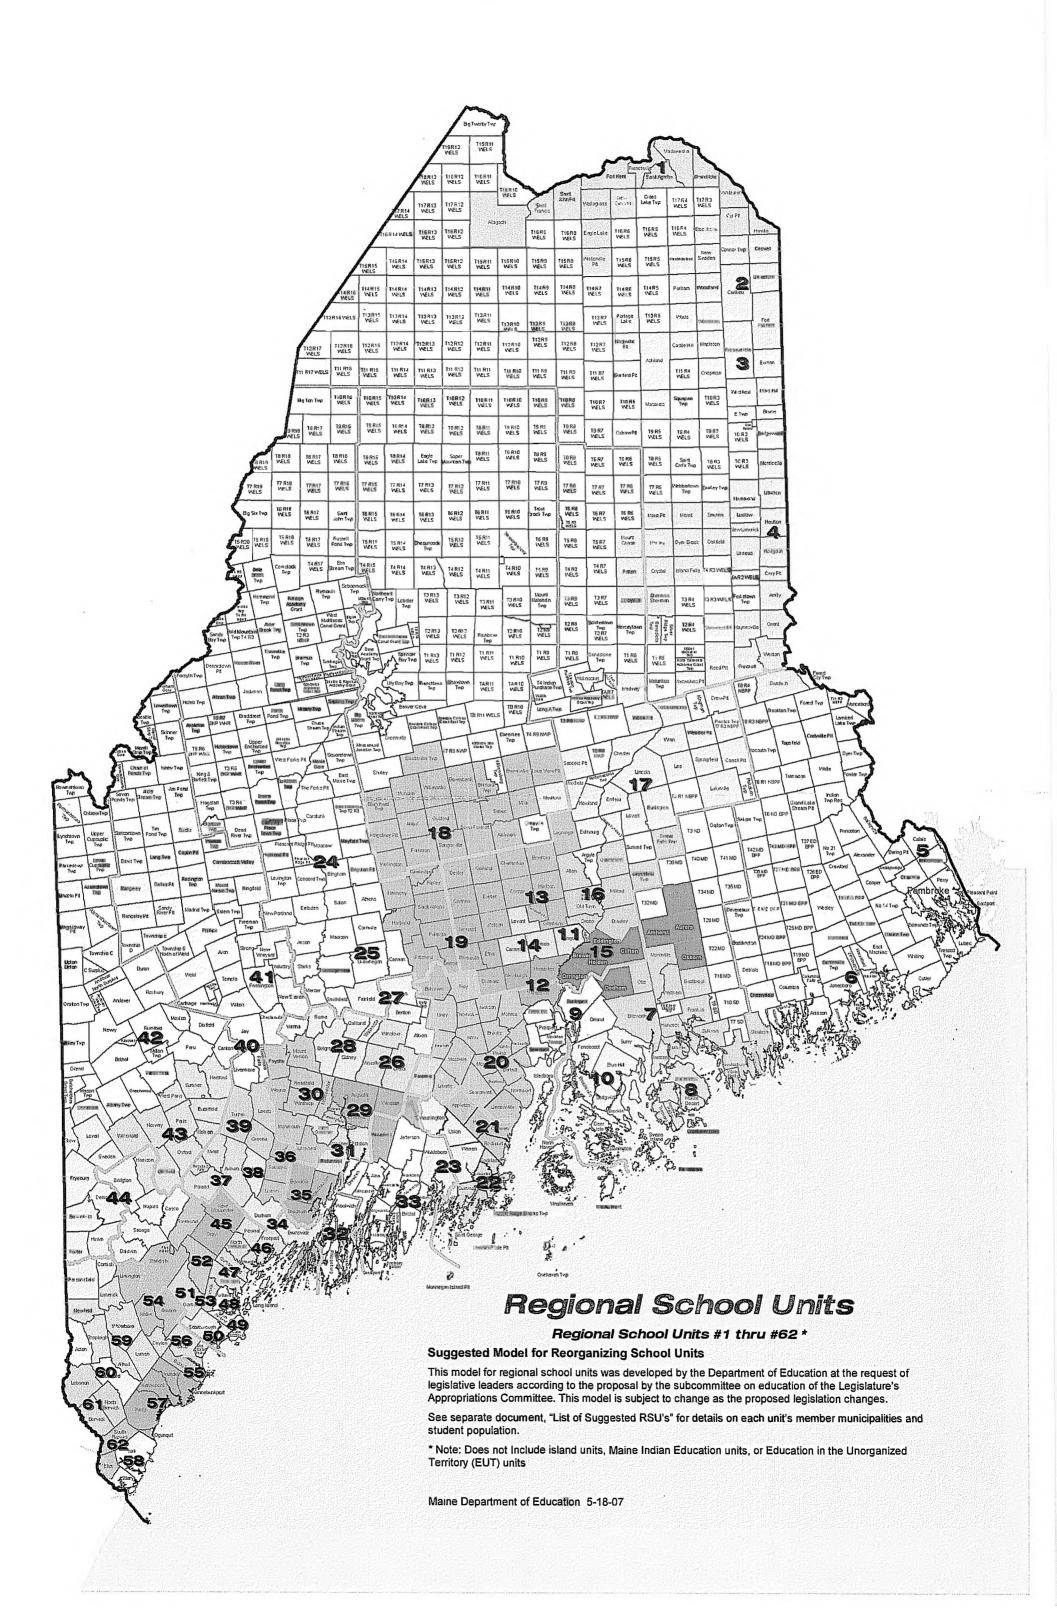

Other Income

O IMOL INCOLIC	
Earnings on Investments	12,000
Donations	1,877
Registration Fees	46,500

Sale of Books	550
Sale of Meals	8,000
Miscellaneous Income	7,500
MaineCare	40,000
E-Rate	4,300
Federal Funds*	65,000
Interest Income	20,500
Rental Income	53,133

Total 259,360

^{*} Please note that the federal funds here are tied into local entitlement and no child left behind funds to support innovative programs and educational projects and are not tied with IDEA funding. IDEA funds are federal monies channeled to the state education departments in the US and the Maine Department of Education uses this federal revenue in the development of their overall general-purpose fund to all public schools statewide.

The University of Maine

University of Maine at Augusta

Dear Chair Rotundo, Chair Fischer and Members of the Joint Standing Committee on Appropriations and Financial Affairs

University of Maine at Farmington

Please find enclosed responses to several questions posed to President Pattenaude on Sunday, May 6th during our Work Session with the Appropriations Committee.

University of Maine at Fort Kent

If you have further questions please feel free to contact me or our legislative liaison John Lisnik, as we stand ready to respond to any additional questions or concerns.

University of Maine at Machias

University of Maine at Presque Isle

Sincerely,

University of Southern Maine

Enclosures (4)

Joint Standing Committee on Appropriations and Financial Affairs

Responses to Questions from the May 6, 2007 Public Hearing of the University of Maine System Budget Request

Question 1: Provide an historical perspective of State Appropriations adjusted for inflation:

Increases in State Appropriations for higher education are often measured against two benchmarks — enrollment growth and inflation. Basically, new funds are needed to cover ordinary increases in operating costs and the costs associated with additional students. A good summary statistic that captures both of these benchmarks is *State Appropriations per FTE Student Adjusted for Inflation*. This summary statistic for the UMS is presented in **Attachment I** — which is reproduced from page 8 of the *FY2008-2009 Biennium Budget Presentation* presented by Chancellor MacTaggart to the joint meeting of the Appropriations & Financial Affairs and Education & Cultural Affairs committees on February 15, 2007.

Analyzing the chart in Attachment I; a flat line over time would indicate that State Appropriations were keeping up with both inflation and student enrollment growth. In other words, the institution would have a "constant purchasing power of funds" for each student it served. Unfortunately for Maine students, State Appropriations for the UMS fell from nearly \$8,000 in FY89 to below \$5,000 in FY07. This represents nearly a 40% decline in the purchasing power of funds for each student over a 20 year period. Consequently, the UMS cannot provide the same amount of equipment, services, or supplies to today's students as it once provided; making for a very challenging situation for the university system to maintain and enhance the quality of the learning experience.

Question 2: Provide the increase in tuition over the past 10 years.

Response: Please see **Attachment II**. Although the University of Maine remains the lowest tuition cost of all the New England land grants, in-state undergraduate weighted tuition rates have increased an average of 5.4% annually and a cumulative increase of 60.7% over the past 10 years.

Question 3: Provide examples of comparable states to Maine who have ensured adequate state funding for their public institutions.

Response: Please see **Attachment III** which is an excerpt from the FY 2006 State Higher Education Finance (SHEF) report. This report summarizes the changes in Public Appropriations per FTE among the States for fiscal years 2005 – 2006.

Question 4: What will the proposed increases in State Appropriation FY08 and FY09 be used for?

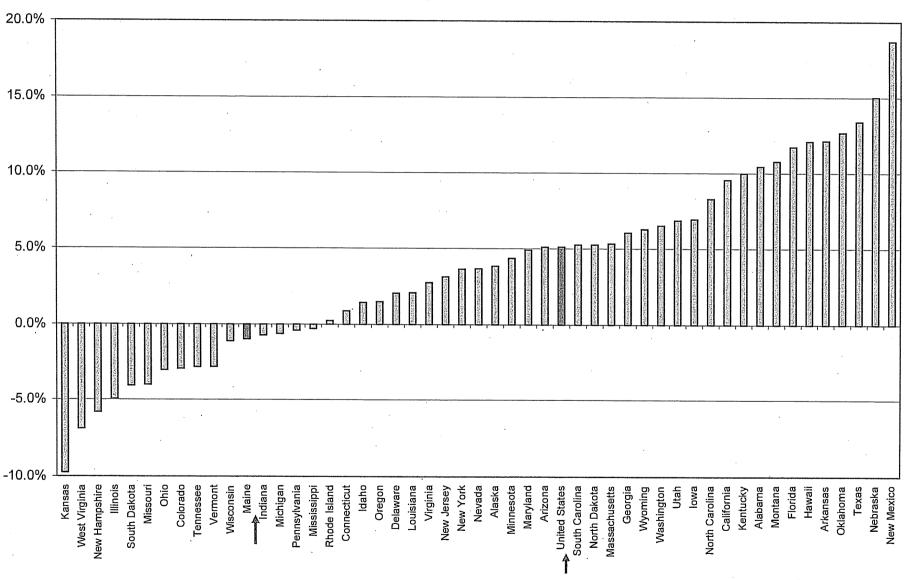

Response: This increase in state appropriation will be used to limit the growth in tuition. Incremental state appropriation is allocated to each university in the University of Maine System in order to minimize the increases in tuition at each campus.

Question 5: What would be the cost to start-up a veterinarian school in Maine?

The initial start-up costs for a vet school is estimated to be \$6.8 million for operating costs and \$18 million for one-time capital costs (labs, classrooms, etc.).

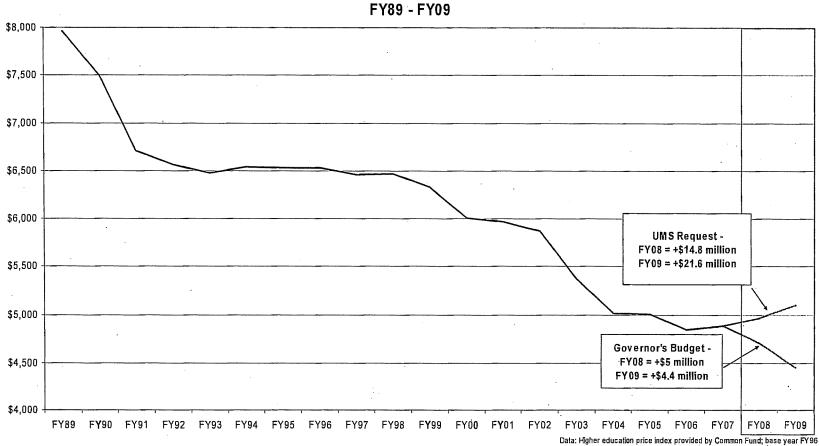

Public Higher Education Appropriations per FTE Percent Change by State, Fiscal 2005 - 2006

MAINE COMMUNITY COLLEGE SYSTEM

Survey of Maine businesses conducted in 2006 by Maine State Chamber indicated that 55% of its members were having difficulty finding skilled workers.

In 2006, the Governor's Community College Advisory Council reported that, each year for the foreseeable future, the state's economy will be short about 4,200 workers with the skills acquired at the community college level.

455,000 working Maine adults do not have a college degree. Over a quarter of a million (273,000) have expressed interest in going to college.

Since transition to community college in 2003:

- Enrollment has grown by 47% 3,560 more students
- State appropriation has increased by only 10.4%
- Place rate of graduates is 95%, with 96% placed in jobs in Maine.

In an April date to date comparison, applications for fall 2007 admission have increased 16% system-wide:

Central Maine Community College – Auburn	9%
Eastern Maine Community College – Bangor	18%
Kennebec Valley Community College - Fairfield	9%
Northern Maine Community College - Presque Isle	6%
Southern Maine Community College - South Portland	22%
Washington County Community College - Calais	36%
York County Community College – Wells	7%

What will \$2 million in each year of the biennium do?

- Allow 500 new students to enroll
- Hire faculty and support staff, in particular in the Admissions and Student Services areas, and purchase of some classroom equipment
- Funding will go to industry areas of highest demand, however, all 7 colleges and regions of the state will benefit based on a review and approval by the MCCS Board of Trustees.
- Programs identified as being at capacity will have priority consideration for addition of sections.

What will less than, or more than, \$2 million in each year of the biennium do?

• For every \$1 million invested, 250 new students can be enrolled

MAINE COMMUNITY COLLEGE SYSTEM

Republican Proposal

- Does not allow for any new enrollment growth
- Reduces current base appropriation for ongoing operations by \$1.7 million in year two of the biennium resulting in:
 - ➤ Projected loss of 350 to 425 students with an additional loss in tuition revenues of \$840,000 to \$1,120,000 which will lead to further reductions in programs, services and number of students served

OR

- ➤ Potential increase in tuition, should the Board of Trustees consider that action necessary, in order to help mitigate the loss would result in:
 - o 9% (\$7.00) increase in per credit hour rate (\$78 to \$85)
 - o Increased cost to students, on average, of \$210 a year for tuition

OR.

> Combination of actions from both of the above

MEMORANDUM BUREAU OF THE BUDGET DEPARTMENT OF ADMINISTRATIVE & FINANCIAL SERVICES

TO:

Members of the Joint Standing Committees on Appropriations & Financial

Services and Education

FROM:

Ællen Jane Schneiter, Bureau of Budget

cc:

Commissioners Wyke and Gendron

RE:

Budget recommendations related to Retired Teachers Group Life

Insurance and Health Insurance

DATE:

March 5, 2007

At public hearing on portions of the Governor's budget recommendations for Education, questions were raised regarding the assumptions underlying the General Fund requests for retired teachers' group life insurance and health insurance coverage. This memo is intended to respond to those questions.

Retired Teachers' Group Life Insurance

- The Governor's budget recommendation for the State cost of retired teachers' group life insurance is found on page A-200 of the budget document and is \$2.4 million in SFY08 and \$2.5m in SFY09.
- This is the first time this cost appears as a discrete program expense in the budget. Historically, there have not been rates developed for individual classes of retirees participating in the MSRS life insurance pool; all individuals were considered as part of a single pool and all funds contributed by the State, by active teachers (the vast majority of whom pay for their own benefit) and employee contributions for supplemental coverage, were simply considered one large pool of money to cover the actuarial costs of insuring the lives of the entire group.
- In preparation for the implementation of GASB-45, MSRS conducted an experience study along with an actuarial analysis of the unfunded liability associated with this insurance program. As a result of that effort, separate rates have been developed for each class of members participating in the group life insurance coverage. These rates comprise both the "normal" cost (the premium cost for current coverage) and the cost of funding the UAL program costs associated with that particular class of participant. Whereas GASB-45 requires only that the UAL be recognized in a program's financial statements, the MSRS governing statute requires the Board to fund all liabilities as they are recognized, in order to fund their coverage in an actuarially sound manner.
- The components of cost for the retired teachers' group life insurance are as follows:

\$0.04 per thousand

"normal" (current) cost

\$0.11 per thousand

UAL cost

The actuarial assumptions underlying the development of these rates are the same as those employed for the teachers' retirement plan. These assumptions are discussed in the MSRS Consolidated Annual Financial Report (CAFR), which is available at their website. Generally, though, those assumptions include 100% continued participation rate for members currently enrolled in the program, a 7.75% per annum rate of return on investment, a range of salary increases spanning from 4.75% to 10% per year and no COLA benefit increases.

Teacher Retirement

- As noted above, the Committees also asked for the actuarial assumptions related to the request for teacher retirement.
- Those assumptions are reflected in the MSRS CAFR, which is available on the agency's website. The same general summary outlined in the last bullet of the group life section applies to teacher retirement, as well.

Retired Teachers' Health Insurance

- The budget request for the State share of retired teachers' health insurance is found on page A-200 of the budget document and is \$17.4m in SFY08 and \$18.6m in SFY09.
- The Committees asked for an overview of benefits provided under that plan, which is sponsored by the Maine Education Association. That overview is attached to this memo.
- The number of retired teachers coming into the plan has increased 4.3% since the beginning of the current fiscal year. Last week, the MEA Benefits Trust adopted new rates for its plans, effective July 1, 2007. The premium rates for non-Medicare retirees (approximately 46% of retired teachers) will be increasing by 8.6%; the rates for Medicare retirees (54% of the total) will be increasing by 5%.
- This new information may mean we have not budgeted enough for this program. 54% of the group (the Medicare retirees) is coming in 2% under the budgeted increase and the other 46% are coming in at 1.6% above the budgeted increase, rendering the budget projections fairly close to target. However, we are still analyzing what the rate increases in combination with the growth in the group may mean to the adequacy of this budget request. If it is determined that the request is insufficient to cover projected costs, we will bring forward a change package for the Committees' consideration.

Benefit Overview MEA Group Companion Plan July 1, 2006

- All Medicare deductible and coinsurance costs listed are in effect January 1, 2007
- Benefits described in shaded areas are subject to the plan deductible before being paid at 80%. MEA Group Companion Plan has a \$100 individual deductible and a \$600 individual coinsurance limit per calendar year.
- To have Medicare send information on claims it has paid directly to Anthem Blue Cross and Blue Shield, your doctor must include your MEA Group Companion Plan certificate number with the claim information sent to Medicare. Please keep your Explanation of Medicare Benefits (EOMB). Group Companion Plan will need the EOMB to process some claims. Your MEA Group Companion Plan EOB will ask you to send Anthem Blue Cross and Blue Shield your EOMB when it is needed.
- Services initially covered by Medicare are paid based upon Medicare approved amounts. Services paid by Group Companion Plan only are paid based upon Anthem Blue Cross and Blue Shield maximum allowances.
 Participating Anthem Blue Cross and Blue Shield professionals will not balance bill members if their charge is greater than the Anthem Blue Cross and Blue Shield maximum allowance.

Business & Education at Work for Maine

March 1, 2007

Hon. Margaret Rotundo, Senate Chair Hon. Jeremy R. Fischer, House Chair Joint Standing Committee on Appropriations and Financial Affairs

Hon. Peter B. Bowman, Senate Chair Hon. Jacqueline R. Norton, House Chair Joint Standing Committee on Education and Cultural Affairs

Dear Senators Rotundo and Bowman, Representatives Fischer and Norton, and Distinguished Members of the Joint Standing Committees on Appropriations and Financial Affairs and Education and Cultural Affairs:

Enclosed please find for the work sessions on L.D. 499 responses by the Finance Authority of Maine to requests made by Committee members at the public hearing held February 15, 2007.

As you will recall, the information requested of FAME included:

- 1. The names of out-of-state colleges and universities (public and private) attended by Maine State Grant recipients;
- 2. A list of actual and potential cuts in federal funding FAME receives to administer the guaranteed federal student loan program (FFELP) and the secondary market federal student loan program (HELPP);
- 3. A financial statement for the NextGen College Investing Plan®; and
- 4. FAME's FY08 FY09 budget request submitted to the Governor.

The enclosed, responsive documents correlate to the above-numbered queries. Additionally, with respect to the terms of Maine State Grant Program reciprocity agreements between the State of Maine and other states, I will provide a verbal response at the work session.

We hope you find this information useful. We look forward to attending the work sessions and to responding to any additional questions Committee members may have.

Sincerely,

John C. Witherspoon Chief Executive Officer

Encl.

^{*} When FAME was asked to reduce its appropriation by 5%, we proposed to eliminate the Business Development and Natural Resources & Marketing appropriations and let the remainder (\$464,000) be taken from the Student Financial Assistance appropriation. The Governor accepted the elimination of the Business Development and Natural Resources & Marketing appropriations, and flat-funded the Student Financial Assistance appropriation.

Questions Posed to the Department of Education by the Joint Standing Committee Appropriations and Financial Affairs and the Joint Standing Committee on Education and **Cultural Affairs** on L.D. 499 Biennial Budget

At the Joint Public Hearing February 16, 2007

Question #1:

Is there a clerical support position in the State Board of Education budget

request?

Response:

There is a full time clerical support position for the State Board of Education in the

Support Systems account.

Ouestion # 2:

What are the specifics for the increase in the College Transition sites from 7

to 30, an increase of 23 sites?

Response:

Maine Adult Education currently has 6 sites funded through State dollars, 1 site funded through a grant from the Betterment Fund and 7 additional programs that are receiving funding from the Nellie Mae Educational Foundation. The funding through Nellie Mae will end in December 2007. This brings our current number of College Transitions programs to 14. These 14 programs provide access to only half of the State. The requested increase will allow us to ensure that all adults who wish to prepare for college are able to access College Transition programming.

This program was established in statute in PL 2005. Chapter 69 and funded at the level of \$200,000 in PL 2005, Chapter 519, Part ZZ. The intent was to increase the funding and expand the number of college transition programs offered in an adult education setting from 7 to 30 sites over a 5 year period (by 2011). This budget proposal allows that number to increase to the full 30 sites in FY 08 and continue.

Question # 3:

The Committees asked for a chart showing the Organizational Program and

Funding Source color coded.

Response:

Please see attached charts. The Color Black indicates General Fund (010); the Color Red indicates Federal Fund (013); and the Color Green indicates Special Revenue

Funding source (014)

Ouestion # 4:

Learning Systems Team and NCLB. What is the funding level of NCLB?

Response:

Please see the attached federal funding charts provided with name of grant, State

Fiscal Years 2005, 2006, and 2007, along with estimated FY 2008.

Question # 5: Post-Secondary Advanced Learning

- (a) Identify the number of eligible students.
- (b) How many students would \$3,500,000 support?

Response:

This recommendation will be removed from the budget proposal in the Change Package. It was to have been funded from savings from the student – to – teacher ratios and language Part F will also be removed from the budget proposal in the Change Package.

Question # 6:

Preschool Handicapped. The question is on the number of declining population.

(a) Could the Department provide 3 year flow chart by disability and age?

Response:

Please see attached flow chart and graph covering ages 3-5 only for the period from 2000 thru 2006 by disability.

Question # 7: How are Professional Development funds to be used?

Response:

The Change Package will propose that these funds (\$1,776,092) be used to fund facilitators to assist at the regional level to implement the Local Schools, Regional Support proposal.

Question # 8:

Teacher Retirement. Did the Local Schools, Regional Support Initiative take into consideration the reduction of personnel?

Response:

The planning for the Local Schools, Regional Support Initiative did not project any fiscal impact on the Retirement System.

Question #9:

There were several other questions posed at this public hearing related to teacher retirement and life insurance. The questions related to the proposed budget recommendations for teacher retirement and various aspects of the retired teachers' health benefits including a description of plan benefits. It is our understanding that both the Department of Administrative and Financial Affairs and the Maine State Retirement System have responded by memo and will be prepared to respond to your questions in work session.

TESTIMONY OF THE MAINE STATE MUSEUM

To The

JOINT STANDING COMMITTEE ON APPROPRIATIONS & FINANCIAL AFFAIRS And The

JOINT STANDING COMMITTEE ON EDUCATION & CULTURAL AFFAIRS
Presented By

JOSEPH R. PHILLIPS, MUSEUM DIRECTOR Regarding LD 499

THE DRAFT BUDGET BILL FOR THE FISCAL YEARS ENDING IN 2008 and 2009

My name is Joseph Phillips and I have been director of the Maine State Museum for nearly 15 years.

MUSEUM ACTIVITY

- The museum presents exhibits, and cares for collections in the Cultural Building, State House and Blaine House. We also loan artifacts and specimens to museums throughout the state.
- Our staff supports other scientific State agencies in preserving their specimen collections.
- Exhibit galleries are open to the public seven days a week.
- One of only 800 museums in the entire country accredited by the American Association of Museums.
- Over half of Maine's fourth grade students (public, private and home-schooled) visit the museum each year.
- One special event, "Bug Maine-ia", brought in 2,800 people in one day last fall.

OUTREACH

- The Maine State Museum works closely with the State Archives in distributing New Century Community Program grant money, and in supporting the Cultural Resources Information Center which provides technical guidance to collecting institutions state-wide.
- A decade of collaboration with the Maine Public Broadcasting Network has most recently involved historical and scientific content for the "Maine Experience" series.

An innovative technical collaboration called "Windows on Maine" was developed
with the Fogler Library at the University of Maine and the Maine Public
Broadcasting Network. This is a federally funded digital resource for teachers of
Maine history and science.

FLAT FUNDING

• MAINE STATE MUSEUM 0180, represents our General Fund Budget, as recommended by the governor, including Office of Information Technology (OIT) calculated increases to be used in purchasing OIT applications services.

This account also includes the Publications Revolving Fund, our Museum Store which generates earned income to pay for the publication of museum books.

- RESEARCH & COLLECTIONS 0174, combines Federal Grants and Private Donations. Past Legislatures have challenged the museum to raise outside money for exhibits and programs. These are labor-intensive efforts which have proven to require several years to succeed. We are currently struggling to raise funds for three important exhibits, targeted for:
 - 2007 Opening 400th Anniversary of the first English settlement in New England, the Popham Colony in Phippsburg.
 - 2008 Opening "At Home in Maine" the story of Maine people and their family lives.
 - 2009 Opening Wabanaki textiles, clothing and costumes of Maine and the Maritime Peninsula of Canada, to be exhibited together for the first time anywhere.

This account also includes one limited time (2-3 years) Museum Specialist III position, funded by a federal grant, to conduct a survey of state-owned science collections in need of preservation and care, held by various agencies.
